Barr's 'Pure' Grasses for Sowing in September (*See below*).

BARR'S 'PURE' GRASS SEEDS

Produce Beautiful Lawns, Tennis and Cricket Grounds, Public Parks, &c.

☛ *Renovate Lawns, &c., in September, after the wear and tear of Summer. For renovating* 20 *to* 30 *lb. of Grass Seed are required per acre.*

The following Mixtures of Grass Seeds are all thoroughly cleaned, and cannot fail to give the greatest satisfaction. There are neither clover nor coarse grasses in the mixtures. The seed is sold by weight, being the only correct method of estimating quantity required for a given space.

To ensure a Fine Lawn, free from weeds and coarse grasses, it is most important that the soil to be sown should be quite clean, that is, free from the seeds of objectionable plants, and the grass seeds used should consist solely of the fine-leaved dwarf-growing grasses. **In sowing Grass Seeds** always take advantage of rainy or damp weather, and after sowing, give a slight covering of clean finely-riddled soil; this, followed by rolling, when the soil is sufficiently dry, will ensure a successful vegetation. After this, frequent cutting and constant rolling will be necessary to have a fine smooth lawn.

Barr's "Thames Embankment" Grass Seeds for Parks, a special mixture which has been found very successful on the Thames Embankment, and in the formation and renovation of many public and private parks and squares around London and throughout the country. **Per lb. 1/3; per 10 lb. 10/6; per 20 lb. 20/-; per 56 lb. and upwards, at the rate of 11d. per lb**

Barr's "Standard" Grass Seeds for Garden Lawns, Golf Links, Cricket Grounds, and Bowling Greens, a special mixture suitable for the above-named purposes, and which is *sure to please* buyers.
Per lb. 1/6; per 10 lb. 12/6; per 20 lb. 22/6; per 56 lb. and upwards, per lb. 1/1.

Barr's New Mixture of Dwarf Grasses, for producing an Extra Fine Smooth Lawn, a special mixture of the finest leaved and dwarfest growing grasses, producing an *extra fine velvety turf.*
Per lb. 2/-; per 10 lb. 18/-; per 20 lb. 34/-; per 56 lb. and upwards, per lb. 1/6.

Dutch Clover, Finest White, if Clover is desired, it may be added to the Grass Seeds at the rate of 3 to 5 lb. per acre. Per lb. 1/6.

WATSON'S WEED-DESTROYING LAWN-SAND will kill Daisies, Dandelions, Plantains, &c., on Lawns, Cricket Grounds, &c., and is also a good fertilizer for the grass. Fuller particulars will be sent on application. Sample canisters, 1/-, 2/6, and 5/6; per ¼ cwt. 9/6; ½ cwt. 18/-; 1 cwt. 34/-

'PHYTOBROMA,'

BARR'S NEW PLANT FOOD.

FOR FLOWERS, VEGETABLES, FRUIT, AND LAWNS.

PHYTOBROMA we can confidently recommend to our Customers as a valuable food for all kinds of plants, being rich in those Chemical properties essential to the health and productiveness of vegetable life.

It contains a large percentage of phosphates and potash salts in a form acting directly on the roots of a plant. It is cleanly to handle and without offensive odour.

Bulbs in pots should have a surface dressing of **PHYTOBROMA** when showing top growth, and again when in bud. In the culture of **Flowering Plants** its use produces a greater profusion of bloom, increased size of flower, and richness of colour.

Exhibitors at Flower Shows will find this a valuable **Manure.**

For the improvement of **Grass Lawns, Tennis Courts, Cricket Grounds, PHYTOBROMA** can be strongly recommended, its use soon producing a thicker growth and richer colour. *Further particulars on application.*
2 lb. tin, 1/-; 7 lb. 2/6; 14 lb. 4/6; 28 lb. 7/6; 56 lb. 12/6; 1 cwt. 20/-

Prepaid Orders for 28 lb. and upwards sent Carriage Paid to any station in Great Britain and any port on the Irish coast.

A Few Practical Hints on Bulb Culture.

PROPER CONDITION OF SOIL.—Only plant bulbs, when the ground is in a nice friable condition, and never when the soil is wet and sticky. Better plant later in good friable soil, than early in wet saturated ground.

PREPARING GROUND FOR BULBS.—After digging or trenching, the ground should be allowed to settle at least ten days before planting. If planted on freshly trenched ground, as the land subsides, the bulbs will be drawn down below their proper depth.

DEPTH TO PLANT.—Many amateurs have a tendency to plant too deeply, and thousands of bulbs are destroyed annually by too deep planting (crocuses especially suffer from this error). A good general rule to follow is, cover the bulb with soil once and a half to twice its own depth but not more, *measuring the bulb* from its base to its shoulder. Thus a daffodil bulb measuring two inches from base to shoulder should be covered with three to four inches of soil, and a crocus bulb measuring one inch in depth with only one and a half to two inches of soil.

PROPER TIME TO PLANT AND BEST POSITION.—Information on this subject is given at the heading of each family. Amateurs frequently fail with many bulbous plants through planting at the wrong season, thinking that because September is the proper time to plant crocuses, all other autumn bulbs should be planted in the same month, whereas such families as Anemones, Ranunculi, Ixias, Sparaxis, Early Gladioli, &c. should not be planted before end of October or November at the earliest; if planted in September they are almost sure to be a failure.

MANURE FOR BULBS.—All bulbs object to the ammoniacal properties of manure, consequently hot or fresh stable manure should never be used to dig in the ground for bulbs, but only well-decayed stable or cow manure such as the material from an exhausted hot-bed (chicken manure is poison to bulbs, being too full of ammonia). The safest manure for bulbs of all description, outdoors, is phosphatic basic slag, price 10/6 per cwt., 1s. per 7 lbs.; this should be put in ground with the bulbs at the time of planting at the rate of 1 ton per acre or 7½ oz. per square yard, and after planting, sprinkle on the surface of the ground sulphate of potash at the rate of 2 cwt. per acre or ¾ oz. per square yard, price 21/- per cwt., 1/9 per 7 lbs. On hot dry and sandy soils, old stable manure may with advantage be used, but simply to act as a sponge to hold moisture in the soil; it should be dug in 15 to 18 inches deep, so as not to come in contact with the bulbs.

Bulbs in pots should have a surface dressing of '*Phytobroma*' when showing top growth and again when in bud (*see page 2 of cover*).

TOP DRESSING.—Where possible, we advise a top dressing to all bulbs through the winter months with some light material such as long straw litter, cut heather, cut furze branches, &c., or cut fern bracken resting on pea sticks (cut fern used by itself lies too wet and is apt to rot the young growths). *The advantage* of this light covering is that it keeps the surface soil sweet, keeps off heavy autumnal rains, and protects any early top growths.

CULTURE FOR EARLY BULB FORCING.

Pot the bulbs 3 to 6, or more according to size, in a 4- or 5-inch pot, barely covering the bulbs with soil. This should be done during August, September, and October, the pots being placed out of doors on a bed of ashes, and covered over with a few inches of cocoa-nut fibre or ashes. *There let them remain for a period of three months at least until the bulbs are well rooted,* and have made a little top growth, when a few pots at a time should be removed to a cold frame and be kept partially shaded for a day or two, after which they should be removed to a moderately warm and *moist* temperature, a plentiful supply of water being then given to the roots. A successional supply of flowers can thus be maintained from November to February.

BARR'S Famous 'Covent Garden'

COLLECTIONS of BULBS.

Sent Carriage-paid with Box and Packing free, on receipt of remittance.

(*After November* 1 *we may find it necessary to make slight changes in the Collections.*)

(A) BARR'S 21/- COLLECTION of BULBS for Forcing.

Contains 310 Bulbs of fine quality, as follows:

12 Choice Named Hyacinths
12 Early White Roman Hyacinths
3 ,, Blush ,, ,,
3 ,, Blue ,, ,,
6 Double Roman Narcissi
6 Paper White 'Early Snowflake' Narcissi
1 Chinese Sacred Lily
3 Polyanthus Narcissus 'Grand Soleil d'Or'
3 ,, ,, Grand Monarque
25 Sweet-scented Single Jonquils
Narcissus (Daffodils)
3 ,, Golden Spur
3 ,, pallidus præcox
6 ,, Telamonius plenus
3 ,, bicolor Horsfieldii
12 ,, poeticus ornatus
12 Single Tulip, Early Scarlet, 'Duc Van Thol'
6 ,, ,, Chrysolora
6 Single Tulip, Cottage Maid
6 ,, ,, Keizerskroon
6 Double ,, Tournesol
50 Splendid (Named) Crocuses
25 Scilla sibirica
50 Elwes' Giant Snowdrop
12 Chionodoxa Luciliæ
12 ,, sardensis
12 Allium neapolitanum
12 Freesia mixed hybrids

Barr's Collections of Bulbs for Forcing, 42/-, 63/-, 84/-, and 105/-,

Containing equally liberal assortments of suitable Bulbs of fine quality, as in the 21/- Collection.

(B) BARR'S 21/- COLLECTION of BULBS

For the Greenhouse, Sitting Room, &c.

Containing 300 Bulbs of fine quality.

Arranged for those who prefer a few sorts only of easily cultivated Winter- and Spring-flowering Bulbs.

20 Choice Named Hyacinths
6 Early White Roman Hyacinths
3 Polyanthus Narcissus Grand Monarque
3 ,, ,, 'Scilly Isles' White
3 ,, ,, Grand Soleil d'Or
25 Sweet-scented Single Jonquils
6 Narcissus Golden Spur
6 Narcissus bicolor Empress
6 ,, Telamonius plenus
6 ,, poeticus ornatus
6 Single Tulip Chrysolora
6 ,, ,, Dusart
6 ,, ,, Princess Marianne
6 ,, ,, Van Vondel
6 Double Tulip Tournesol
100 Splendid Crocuses (Named)
25 Scilla sibirica
12 Chionodoxa Luciliæ
12 ,, sardensis
25 Elwes' Giant Snowdrop
12 Milla uniflora

Barr's 12/6 Collection of Bulbs for Greenhouse, &c.

Containing about half the quantity of Bulbs as in the 21/- Collection.

Barr's Collections of Bulbs for Greenhouse, &c., 42/-, 63/-, 84/-, & 105/-

Containing equally liberal assortments of suitable Bulbs of fine quality, as in the 21/- Collection.

(C) BARR'S 21/- COLLECTION of BULBS

For the Flower Garden,

Containing 652 Bulbs of fine quality, most suitable for outdoor decoration.

25 Hyacinths, Barr's Rainbow Mixture, Large-flowered
6 Polyanthus Narcissi
5 Daffodil Queen of Spain
5 ,, obvallaris
5 ,, princeps
5 ,, pallidus præcox
5 ,, incomparabilis Queen Bess
5 ,, Leedsii amabilis
5 ,, poeticus ornatus
12 Jonquil Daffodil 'Rugulosus'
25 Single Tulips, Barr's Rainbow Mixture
25 Double Tulips, Barr's Rainbow Mixture
50 Crocus, large yellow
50 ,, ,, striped
50 ,, ,, blue
50 ,, ,, white
50 Snowdrops
12 Scilla sibirica
12 Chionodoxa Luciliæ
12 ,, sardensis
24 Winter Aconites
12 Blue Grape Hyacinth
12 Allium Moly, yellow
25 Star of Bethlehem
25 Wood Hyacinths, mixed
10 Milla uniflora
25 Summer Snowflakes
12 Fritillaria, mixed
2 Crown Imperials, in two vars.
2 Lilium candidum
2 ,, tigrinum splendens
25 Spanish Irises, mixed
12 English Irises, mixed
50 Anemone, Large-flowered, Single, mixed

Barr's 12/6 Collection of Bulbs for Flower Garden,

Containing half the quantity of the Bulbs enumerated in the above 21/- Collection.

Barr's Collections of Bulbs for Flower Garden, 42/-, 63/-, 84/-, & 105/-,

Containing an equally liberal assortment of suitable Bulbs of fine quality, as in the 21/- Collection.

(D) BARR'S 'Woodland' 21/- COLLECTION of BULBS

For Naturalising in Woodlands, Orchards, Wild Gardens, &c.

Containing 1,000 suitable Bulbs of fine quality.

200 Daffodils, mixed of all kinds
75 Winter Aconites
75 Star of Bethlehem, white
50 Blue Starch Hyacinths
150 Crocuses, mixed
100 Wood Hyacinths, mixed
100 Elwes' Giant Snowdrops, small bulbs
25 Summer Snowflakes
25 Dog's-Tooth Violets, mixed
25 Anemone, Single, mixed
12 ,, apennina
50 Milla uniflora
25 Allium Moly, yellow
25 Lily of the Valley, crowns
12 Snakeshead Fritillarias
6 Crown Imperials, mixed
3 Lilium davuricum, mixed
3 ,, pyrenaicum, yellow
3 ,, candidum
12 Gladiolus Colvillei
12 ,, ,, The Bride
12 ,, byzantinus

Barr's 12/6 'Woodland' Collection of Bulbs,

Containing half the quantity of the Bulbs enumerated in the above 21/- Collection.

Barr's 'Woodland' Collections of Bulbs, 42/-, 63/-, 84/-, and 105/-,

Containing an equally liberal assortment of suitable Bulbs of fine quality, as in the 21/- Collection.

(E) BARR'S 'Rock Garden' 21/- COLLECTION OF BULBS

Consisting of charming little

Subjects for Naturalising on Rockwork, Banks, &c.,

where they will soon establish themselves and form a delightful picture.

12 Allium Moly
12 ,, neapolitanum
6 ,, triquetrum
6 Anemone fulgens
12 ,, apennina
6 Anomatheca cruenta
3 Bloomeria aurea
12 Brodlæa grandiflora
18 Chionodoxa Lueiliæ
12 ,, sardensis
6 Crocus asturicus
6 ,, sativus
12 ,, speciosus
6 ,, chrysanthus
6 Crocus aureus sulphureus concolor
6 ,, biflorus argenteus
12 ,, Cloth of Gold
12 Erythronium dens canis, mixed
12 Fritillaria meleagris, mixed
25 Galanthus Elwesii
6 Hyacinthus amethystinus
6 Iris persica
3 ,, reticulata
12 Leucojum vernum
12 Milla uniflora
12 ,, ,, violacea
6 Muscari Heavenly Blue
6 Muscari botryoides pallidum
6 Narcissus nanus
12 Ornithogalum umbellatum splendens
6 Puschkinia libanotica compacta
6 Romulea speciosa
12 Scilla sibirica
12 ,, bifolia
6 ,, campanulata
6 ,, ,, alba
6 Sternbergia lutea
12 Tulipa persica
25 Winter Aconites
6 Zephyranthes candida

Barr's 'Rock Garden' 12/6 Collection of Bulbs,

Containing about half the quantity of Bulbs as in the 21/- Collection.

(F) BARR'S Choice 'Alpine Garden' 21/- COLLECTION OF BULBS

Consisting of choice little

Subjects in Bulbous Plants, suitable for the Alpine Garden.

3 Anemone stellata, 'White Gem'
3 ,, blanda
3 Brodlæa Murrayana
3 Calochortus albus
3 ,, pulchellus
6 Chionodoxa gigantea
3 Corydalis bulbosa
3 Crocus sativus Cartwrightianus
3 Crocus zonatus
3 Crocus Sieberi
6 ,, biflorus pusillus
3 ,, Tommasinianus
6 Cyclamen Ibericum, mixed
3 ,, neapolitanum
3 Erythronium giganteum
3 ,, Hendersoni
3 Fritillaria armena
3 ,, aurea
6 Galanthus Ikariæ
3 Iris reticulata
6 Leucojum vernum carpathicum
3 Muscari Heavenly Blue
3 Narcissus cyclamineus
3 ,, minimus
3 Puschkinia libanotica
3 Romulea Clusii
3 Scilla sibirica taurica
2 Tropæolum polyphyllum
3 Tulipa Clusiana
6 ,, persica

A Few Fine Novelties and Specialities

IN BULBS AND TUBERS &c.

each—*s.* *d.*

ALBUCA Nelsoni, a most beautiful Cape bulb, producing in June handsome spikes of almond-scented flowers, pure white with slight brown stripe (under glass *pure white*). For pot-culture or outdoors under south wall, ht. 3 ft. .....per 100, 40/– ; per doz. 5/6 0 6

ALLIUM Schuberti, a very curious and beautiful new species, having star-like flowers of a pretty rose-lilac colour, radiating from the top of the stem, ht. 1½ to 2 ft. It is hardy, if lightly covered during severe weather in winter .....per doz. 10/6 1 0

zebdanense, a lovely species from Asia Minor, bearing graceful heads of snowy white flowers, quite hardy, ht. 15 inches .....per doz. 7/6 0 8

ANEMONES—plant from October to February, but by preference in November, and protect from ground winds.

fulgens Leichtlini, very large handsome flowers, fiery scarlet with white centre ; plant under a south wall or in any other warm situation 2 6

Giant Single 'Glory of the South,' this is a grand Anemone ; the flowers are single and very large, with broad rich brilliant scarlet petals and rich blue-black central boss ; a flower of great beauty and fine substance .....per 100, 10/6 ; per doz. 1/6 ...

New Double 'Victoria Giant,' a double strain of this grand Anemone, colours most brilliant and varied, and flowers very large .....per doz. 3/6 0 4

,, ,, **'La Dame Blanche,'** white, faintly tinged rose, large flowers with broad outer petals and centre filled with incurving florets, of great beauty. **1st Class Certificate**.....per 100, 21/– ; per doz. 3/– 0 4

,, ,, **'Snowball,'** very beautiful snowy white curled flowers, resembling in form a white incurved Chrysanthemum. **1st Cl. Cert.**...p. 100, 21/– ; p. doz. 3/– 0 4

,, ,, **'Vesuvius,'** flowers of perfect form and fully double, rich brilliant scarlet, a most striking flower .....per 100, 24/– ; per doz. 3/6 0 4

'St. Brigid,' a very lovely strain of Poppy Anemones, flowers very large, mostly semi-double, and of the most brilliant and varied shades of colour, all having a handsome blue-black central boss. Plants graceful in habit, and remarkably free-flowering ...per 100, 10/6 ; per doz. 1/6 ...

BRODIÆA candida, bearing umbels of large light blue flowers, very handsome in borders, 1 ft. When planting cover the bulbs with sharp sand .....per doz. 7/6 0 8

CALOCHORTUS VENUSTUS—Eldorado Strain, a new race of the lovely *Butterfly Tulips* of tall sturdy growth, from 1½ to 2 ft. in ht., and flowers distinct in form and colouring. They vary greatly in shade—from white and cream to lilac, deep velvety purple and rosy purple, red, pink, and salmon. All have a showy centre of brown and yellow prettily speckled, while others have a beautiful golden blotch on each petal. As cut flowers they are invaluable, the buds opening well in water, and for beauty they cannot be excelled ; they continue in bloom often for two months, and delight in a warm sunny situation and light sandy soil. (*For full Cultural Notes see page* 15.) The Royal Horticultural Society granted this strain an **Award of Merit, 1896.** (*For Illustration of Butterfly Tulips see page* 13.)

Beautiful varieties mixed, per 100, 18/– ; per doz. 2/6 ...

EREMURUS himalaicus, a most lovely species from the Himalayas, and one of the hardiest. It attains a height of 5 to 8 feet, bearing dense heads nearly 2 feet long, of large snowy white flowers, with golden anthers, from May to June. It requires a well-drained soil with a north or north-west aspect, protected from cutting winds in spring.....*roots of flowering size* 5 6

ERYTHRONIUM revolutum 'Pink Beauty' (new). We have much pleasure in introducing this lovely variety. The flowers are large with gracefully reflexing petals, colour delicate pale pink with a central zone of gold. (*See Illustration, page* 14.) We strongly recommend it to all lovers of hardy flowers.....per 100, 30/– ; per doz. 4/6 0 5

ERYTHRONIUM revolutum Pink Beauty and **Watsoni, in mixture,** two beautiful large-flowered American Dog's-Tooth Violets, of the same elegant form, but the former is pink and the latter white. They delight in a rather moist sandy soil and shady situation .....per 100, 30/– ; per doz. 4/6 0 5

FRITILLARIA—all lovers of shade ; when planting cover the bulbs with sand.

Elwesii, a beautiful species, with large bell-shaped flowers reflexed at mouth, olive-coloured, with brown markings, ht. 1 ft. .....per doz. 7/6 0 8

pluriflora, true, a remarkably distinct and beautiful species introduced in 1896, of very graceful habit, flowers pale rosy purple, *very early. It is a native of the Sacramento Valley,* and delights in shade and protection from cutting winds .....per doz. 7/6 0 8

Whittallii (new), flowers beautifully tesselated inside and out with reddish brown on a yellowish ground. *1st Class Certificate R.H.S.*.....per doz. 5/6 0 6

GALANTHUS cilicicus, a fine new species resembling *G. Fosteri,* but flowering in late autumn and early winter. It is a tall grower with long handsome flowers.....per doz. 4/6 0 5

Ikariæ, a most distinct and beautiful Snowdrop, with broad glossy light green reflexing foliage, flowers snowy white, inner segments heavily tipped bright green, per 100, 10/6 ; per doz. 1/6 0 2

GALANTHUS—*continued.* each—*s.* *d.*

Elwesii var. Whittalli, a grand new Snowdrop discovered by Mr. Whittall of Smyrna, this year, and remarkable for its immense flowers, bold foliage and tall strong growth per 100, 21/-; per doz. 3/- ...

GLADIOLUS, 'Peach Blossom,' a lovely new *early* Gladiolus, producing graceful spikes of flowers of a charming delicate pale salmon-pink; *plant from Oct. to Nov.* ...per doz. 5/6 0 6

IRIS persica Mardinensis, a new Iris from Mesopotamia, flowers silvery grey with large violet-purple spots, very free and three weeks earlier than *I. persica* .....per doz. 10/6 1 0

Vogeliana, a beautiful new Iris, flowers larger than *I. persica*, and variable in shade of colour, silvery grey with purple, violet, rose or lilac markings..... 1 3

LACHENALIAS, beautiful new varieties, raised by the Rev. Theodore Marsh, all decided improvements and valuable additions to this lovely family of plants.

Cawston Gem, yellow, tipped pink, robust grower .....per doz. 7/6 0 8
Garnet, very early, yellow with deep ruby edge ..... ,, 10/6 1 0
Rector of Cawston, rich deep yellow, tipped red, dwarf ..... ,, 7/6 0 8
Ruby, flowers scarlet, yellow and green, very showy ..... ,, 7/6 0 8
Topaz, rich deep yellow, with narrow purple margin ..... ,, 7/6 0 8

LILIUM auratum, 'Beauty of Japan,' *the finest of all Japanese Lilies*, a splendid new variety of *Lilium auratum platyphyllum* type, its grand large flowers being very broadly banded, with glowing dark crimson down centre of petals, a fine acquisition..... 17 6

Bolanderi, a beautiful new Lily from Oregon, with dense whorls of foliage and elegant bell-shaped flowers, deep crimson spotted maroon, ht. 1½ ft. **1st Class Certificate**..... 2 6

Harrisii (The Bermuda Easter Lily), a few special monster bulbs 2 6

Henryi, a most handsome and elegant Lily discovered lately by Dr. Henry in North China; the flowers resemble in form *L. speciosum*, but are orange-yellow in colour and freely produced on elegant branching heads, a hardy and vigorous grower, ht. 5 to 6 ft..... 5 6

Humboldti magnificum, a splendid new variety, bearing large handsome flowers deeper in colour than *L. Humboldti*, and more heavily spotted; the recurved petals are conspicuously tipped purplish brown, ht. 5 ft. **1st Class Certificate.** *A good strong grower*.....3/6 & 5 6

marhan, a splendid hybrid Lily, a cross from *L. martagon album* × *L. Hansoni*; it produces large elegant spikes of flowers, deep yellow speckled brown and dotted crimson, 3½ ft. *1st Class Certificate R.H.S.*..... 12 6

pardalinum Johnsoni, *one of the best of the Pardalinums*, from British Columbia, of strong sturdy growth with dark green foliage and very showy flowers, glowing crimson shading to orange, ht. 5 ft. .....2/6 & 3 6

Parryi, a very beautiful Californian species, with large bright yellow flowers lightly spotted and of delicate perfume, ht. 3 ft. **Awarded 1st Class Certificate R.H.S.**..... 3 6

Roezlii, true, *a rare Lily* from the Pacific coast, bearing an elegant raceme of brilliant orange-red flowers spotted purple and with reflexed petals, ht. 3 ft..... 3 6

rubellum, one of the most beautiful of recently discovered Japanese Lilies. The growth is slender like that of *Krameri*, the flowers are of distinct elegant form and a delicate pale rose, with golden anthers, hardy, 1½ ft. .....2/- & 3 0

LILY OF THE VALLEY, Fortin's Giant-flowered Strain (*see Illustration, page* 42), a very beautiful strain with remarkably large handsome bells on long sturdy stalks; a giant compared with the ordinary Lily of the Valley; the finest results are obtained from outdoor culture; plant either in the open or under a south wall, placing the crowns 6 to 9 inches apart, and let them establish themselves. Top dress the beds annually in March with *old* manure. They should not remain more than four years in one spot. The **flowering crowns** offered may be potted and brought on *very slowly* under glass, but they must not be potted or boxed up before March; ordinary forcing will cause them to go *blind* .....**flowering crowns,** per 100, 15/- ...
Planting crowns (*specially recommended*), per 100, 8/6 ...

MUSCARI, Heavenly Blue, *see page* 44.

neglectum carneum, *a rare starch Hyacinth*, bearing spikes covered with beautiful bell-shaped flowers of a pretty rosy flesh shade .....per doz. 7/6 0 9

PLACEA ornata, a beautiful and rare bulbous plant of the Amaryllis family, flowers snowy white lined vermilion, ¾ ft.; it is suitable for pot-culture in cool greenhouse..... 3 6

RICHARDIA

albo-maculata sulphurea, a beautiful new Arum Lily, with soft yellow flowers with black centre and white spotted foliage; a pretty plant for pots, beds and borders 2 6

Pentlandii, the beautiful large Golden Arum Lily, a noble plant with handsome plain deep green foliage and large rich golden-yellow flowers .....15/- & 21 0

SPIRÆAS, Beautiful New Hybrids. As highly decorative plants for the greenhouse and sitting-room, these can be strongly recommended.

Blondin, a fine hybrid of *S. astilboides* × *S. japonica*, fine compact habit and erect bushy broad heads of white flowers .....per doz. 21/- 2 0

longifolia, a beautiful hybrid of *S. astilboides* × *S. japonica*, bearing long graceful arching plumes of snowy white flowers .....per doz. 21/- 2 0

Silver Sheaf, a beautiful hybrid of *S. astilboides* × *Astilbe Thunbergi*, with long graceful plumes of white flowers.....per doz. 8/6 0 10

Snow Plume, another fine hybrid of *S. astilboides* × *Astilbe Thunbergi*, bearing handsome plumes of white flowers .....per doz. 8/6 0 10

each—*s.* *d.*

STERNBERGIA (Lily of the Field). These charming bulbous plants require a sunny aspect and a good deep light soil, and should be left to establish themselves; plant over them Sedums, or cover in winter with dry litter.

Fischeriana, a handsome Spring-flowering species of '**Lily of the Field**' .. per doz. 5/6 o 6

macrantha, a new species, with very large golden-yellow flowers in autumn ... ,, 5/6 o 6

TROPÆOLUM Leichtlini (new), resembling in habit *T. polyphyllum*, but flowers much deeper and brighter in colouring, being of a rich brilliant orange-gold, very hardy, free grower and profuse bloomer, charming used as a climber or trailer .....per doz. 24/– 2 6

TULIPA Kaufmanniana, a rare and beautiful Tulip, bearing early in the season large flowers of elegant form and remarkable beauty, petals large, broad and reflexing, creamy white with more or less carmine-red on the reverse, centre yellow.....per doz. 15/– 1 6

Lownei, a beautiful rare species, flowers starry, light rose with yellow centre ... ,, 7/6 o 8

Mauriana, a very rare species, flowers large, orange-scarlet with clear golden centre 4 6

Mrs. Moon, a magnificent *giant yellow* Tulip belonging to the section of 'May-flowering Cottage Tulips'; it attains a height of 2½ ft., with very long pointed-petalled flowers of a rich golden colour, and of great substance. (*See Illustration in 'The Garden,' May* 16, 1896) 2 6

saxatilis, a real gem amongst Tulip species, flowers delicate rose with large bright yellow centre, very beautiful. *Award of Merit R.H.S.*, ht. 11 inches.....per doz. 5/6 o 6

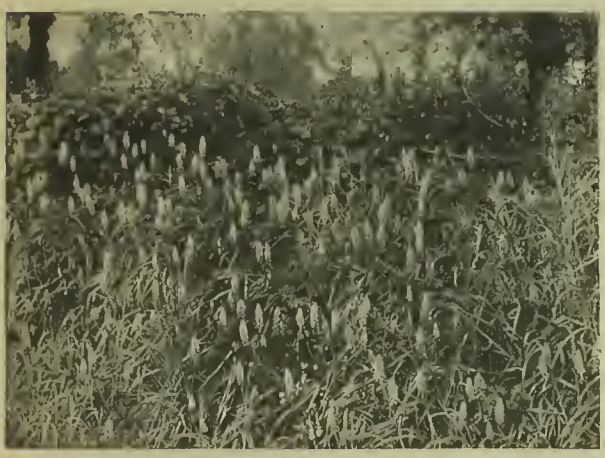
Sprengeri, a beautiful and very showy species, and the latest of all to bloom; the flowers are of a brilliant scarlet .....per 100, 25/–; per doz. 3/6 ...

Hardy Bulbs and Plants

FOR EXTENSIVE PLANTING

IN SHRUBBERIES, FLOWER BORDERS, ON ROCKWORK, &c., AND TO NATURALISE IN WILD GARDENS, WOODLANDS, ALONG CARRIAGE DRIVES, ON BANKS, IN GRASS, &c.; ALSO TO PLANT FOR CUT FLOWERS.

For full descriptions see body of Catalogue.



MUSCARI 'HEAVENLY BLUE,' ESTABLISHED ON A HEDGE BANK AT OUR LONG DITTON NURSERIES.

Year by year we see the taste increasing for the so-called '**Wild Garden,**' or the grouping of hardy subjects in a free and unconventional manner, leaving them to colonise and form themselves into pretty natural groups, such as Nature exhibits to us in her woods and copses, and wherever she has been left to reign undisturbed. This phase of gardening is one which must have a great attraction for the lover of hardy flowers; by it, bare and ugly places may be made beautiful, and a charm added to the landscape. Few sights are more beautiful in Spring than such hardy flowers as Daffodils, Snowdrops, Chionodoxas, Muscaris, Anemones, &c., established in grass. The experiment has been successfully made at Kew Gardens, to the great delight of visitors, and large stretches and slopes of grass-land thus planted, presented in Spring quite a '**Riviera**' picture. At the earliest dawn of Spring the following flowers will lighten up the landscape with their fresh bright colours: *Winter Aconites, Snowdrops, Early Scillas, Chionodoxas, Early Daffodils*, &c., followed by *later-flowering Daffodils, Crocuses, Muscaris, Anemones, Star of Bethlehem, Cowslips, Late Scillas, Cottage Tulips*, &c. All the foregoing may be grown in grass-land where the grass is not cut till the meadows are mown. On *lawns*, which require cutting earlier, such charming little early-flowering subjects as *Snowdrops, Chionodoxas, Early Dwarf Daffodils*, and *Scillas* may be planted. In places where the grass is not required to be cut, a still wider scope for gardening presents itself, as several of our Summer- and Autumn-flowering Lilies may be introduced, as also other tall and stately flowers.

N.B.—We have marked thus † those flowers which will thrive in shady places, under trees, on shady banks, &c., or may be planted in the open border. The variously coloured *Wood Hyacinths* (Blue Bells) will establish themselves freely under Pine and Fir trees and in shady nooks, where scarcely any other flower will thrive, and seen thus they present a lovely sight. § **Indicates those bulbs, &c.,** which are essentially wood plants, and should *only* be grown in *shady situations.*

BARR'S

ALPHABETICAL DESCRIPTIVE LIST

OF

Bulbs, Tubers, and Plants,

FOR ALL SEASONS AND CLIMATES.

In the following pages we give descriptions, as far as space permits, of the various Bulbs, &c., with general notes as to their cultural requirements. The illustrations are mostly reproductions, on a greatly reduced scale, of sketches and photographs taken at our **Long Ditton Bulb Nurseries.** Great care is taken in the selecting of our Bulbs, these being drawn from the **best bulb farms only.** High-class Daffodils and Tulips, &c., also many little rare and beautiful bulbous plants, *we are ourselves large growers of*, and are in a position therefore to select for our customers an extra fine quality.

☞ **Those marked thus * ripen late and are sent out from the middle of October to March. All other bulbs, &c., are ready for despatch in September. Orders which embrace earlier and later ripening bulbs, &c., will be executed therefore in two parts.**

each—*s.* *d.*

***ABOBRA VIRIDIFLORA,** an elegant half-hardy perennial *scarlet-fruited* climber; plant outdoors in Spring and lift the tubers in Autumn, storing them in dry sand in a cool place away from frost .....per doz. 5/6 0 6

***ACHIMENES,** these make charming pot-plants for the greenhouse, and are very decorative with their brilliantly coloured elegant flowers; pot in rich light soil in Spring and start in bottom heat. **12 varieties, 1 root each, 3/6; 3 roots each, 12 varieties, 8/6.**

***tubiflora** (*syn.* **Dolichodeira**), a valuable pot-plant for greenhouse, bearing trusses of long tubular white flowers of a delicious and powerful scent .....per doz. 4/6 0 5

ACONITE—WINTER. *See* **Winter Aconite.**

AGAPANTHUS (African Lily), valuable pot-plants for the greenhouse, and when grown in tubs on terrace walks and lawns few plants give a more noble effect; very effective planted out by streams, lakes, and ponds. During severe winters they should be covered, or in very cold climates be taken indoors until Spring, water being given only sparingly. This plant is a gross feeder, and likes a rich soil and plenty of moisture while in growth.

umbellatus, handsome umbels of rich blue flowers .....per doz. 7/6 0 9

,, **flore-pleno,** a very handsome variety, with fine double blue flowers ,, 15/- 1 6

,, **maximus,** same colour as *umbellatus*, but with larger flowers ..... ,, 15/- 1 6

,, **albus,** handsome umbels of white flowers ..... ,, 10/6 1 0

,, **Mooreanus,** small blue flowers in graceful umbels ..... ,, 5/6 0 6

***ALBUCA,** decorative greenhouse Cape bulbs, which may also be planted out under a south wall.

canaliculata, producing handsome trusses of very fragrant *golden-yellow* flowers, 1½ ft..... 2 6

fastigiata, produces handsome trusses of *white* and *green* flowers, 1½ ft. .....per doz. 4/6 0 5

Nelsoni, a lovely species. *See* **Specialities,** *page* 4.

ALLIUM, a decorative and showy family of hardy Spring- and Summer-flowering bulbs, valuable alike for borders or rockwork and for naturalising in woods, &c. *A. neapolitanum* is easily forced, and the cut blooms are extensively used for vases and table bouquets.

acuminatum, with beautiful soft rose-lilac-coloured flowers in umbels, 1 ft. ...per doz. 1/6 0 2

azureum, handsome intense blue flowers, quite hardy, 2 ft..... ,, 2/6 0 3

cyaneum, pretty deep blue flowers in clusters, ½ ft.....*established tufts* 1 6

karataviense, a remarkably handsome plant, with very large broad glaucous-green foliage spreading close to the ground, ½ ft. .....per doz. 5/6 0 6

Moly, bright yellow flowers in large handsome umbels, very showy, valuable for naturalisation, 1 ft. .....per 100, 3/6; per doz. 6*d.* ...

neapolitanum, an elegant bouquet flower largely grown for the market, producing numerous heads of graceful white flowers; it is a charming plant to naturalise in shady woods, ht. 15 inches .....per 100, 3/6; per doz. 6*d.* ...

Ostrowskianum (*syn.* **oreophyllum**), a charming species from Asia Minor, with large heads of beautiful rose-coloured flowers, 2 ft. .....per 100, 15/-; per doz. 2/3 ...

pedemontanum (*syn.* **narcissiflorum**), rose-purple, drooping bell-shaped flowers in clusters, beautiful and very distinct, ¾ ft. 1 6

pulchellum, graceful heads of charming bright rosy purple flowers, in July, ¾ ft., per doz. 4/6 0 5

,, **flavum,** small canary-yellow flowers in graceful drooping umbels, very charming, July-flowering, ¾ ft. .....per doz. 3/6 0 4

Rosenbachianum, large purple-rose flowers, 2½ ft..... ,, 5/6 0 6

triquetrum, white, striped green, graceful drooping umbels, pretty, 1 ft. per 100, 7/6; per doz. 1/3 ...

ALOCASIA odora, a grand foliage plant for greenhouse decoration or sub-tropical work in Summer, 3 ft. 2 6

***ALSTRÖMERIA.** These beautiful '**Peruvian Lilies**' are easy to cultivate, and produce in Summer abundance of showy attractive flowers, which last long in water when cut. As border plants they may be strongly recommended for the brilliant effect they produce in the garden. Plant so that the top is four inches below the surface, selecting by preference a situation close to a south wall or hedge, and protecting, the first Winter, with leaves or litter. *A. pelegrina* and *A. pulchra* are more tender, and delight in hot dry sunny situations, such as under a south wall ; they also make fine plants for a cool greenhouse.

	each—	*s.*	*d.*
aurantiaca, flowers rich orange, spotted carmine, very showy and valuable for cutting ; it is quite hardy, and should be grouped in every herbaceous border, 3 ft., p. 100, 12/6 ; p. doz. 1/9		0	2
chilensis hybrida, mixed, beautiful shades of rose, crimson, orange, yellow, buff, and blush, with yellow and crimson markings, valuable as cut flowers, per 100, 12/6 ; per doz. 1/9		0	2
lutea, bright yellow flowers with carmine spotting, very pretty, 3 ft. ,, 10/6 ; ,, 1/6		0	2
pelegrina alba, white, very chaste and beautiful flowers, *grow under a south wall or in frames* ,, 5/6		0	6
,, **rosea**, rose-coloured flowers, beautifully spotted *grow under a south wall or in frames* ,, 3/6		0	4
psittacina (The Parrot Flower), bright crimson flowers splashed green and mahogany, 3 ft. ..... per 100, 12/6 ; per doz. 1/9		0	2
pulchra (tricolor), white and yellow flowers, striped and blotched crimson, protect in severe weather .....per doz. 3/6		0	4

***AMARYLLIS (Hippeastrum), Large-flowered choice Greenhouse Varieties.** These are magnificent in the conservatory, and valuable to cut for table bouquets and vases ; with management, they may be had in bloom for many months. The **unnamed hybrids** quoted we specially recommend, as they are from the best collection in Europe, and are sure to please, both as regards variety, beauty of colour, and size of flowers.

CULTURE.—Immediately after potting, place in a moist warm temperature, and plunge the pot to the rim in a gentle, steady, moist bottom heat ; thus treated, a vigorous leaf-growth is produced, and a strong stem with a fine umbel of large flowers secured. In the absence of bottom heat they do well in an ordinary greenhouse or sunny sitting-room window.

Barr's Choice Unnamed Hybrids, *purchasers are sure to be satisfied with the flowers, and have a good chance of getting new varieties of exceptional beauty*.....per doz. 25/– ; each, 2/6

Barr's Choice Named Large-flowered varieties.

These we can strongly recommend for their large flowers, of excellent form, and rich colours.

12 magnificent exhibition vars.	£7	7	0	**12 extra fine named varieties**	£5	5	0
6 ,, ,, ,,	4	0	0	**12 good showy named** ,, 30/– &	2	2	0

Particulars of the above collections can be had on application.

AMARYLLIS. Various Species.

	each—	*s.*	*d.*
Belladonna (The Belladonna Lily), bearing umbels of beautiful large white flowers flushed and tipped soft rose. If planted in light soil (*the top 6 inches below the surface*) against a south wall it will establish itself and bloom freely every year .....per doz. 6/6		0	8
***formosissima (Jacobea Lily)**, beautiful large quaintly shaped dark crimson flowers per 100, 25/– ; per doz. 3/6		0	4
***formosissima glauca,** differs only from above in the colour being a striking crimson-scarlet .....per 100, 25/– ; per doz. 3/6		0	4

☞ The **Jacobea Lilies** may be grown in pots and forced, or be planted in the open in April for Summer-flowering.

AMORPHOPHALLUS, curious and ornamental bulbous plants from the tropics, interesting as pot-plants and valuable for sub-tropical bedding. The tubers should be kept dry and away from frost during Winter, and may be planted outdoors March to April, four inches deep, or for indoors potted earlier.

campanulatus, a very curious species, flowers very large, dark red and black, and produced close to the ground	1	6	
Rivieri (Umbrella Arum), a very handsome plant, with large palm-like leaves 2 to 3 ft. in diameter, on a white spotted stem ; it makes a charming pot-plant for a room **Strong Tubers,** per doz. 10/6	1	0	

ANEMONE, or WINDFLOWER. (*See also* **Novelty List,** *page* 4.)

For brilliancy of colour few flowers can compare with the **Anemone,** which in Spring produces its masses of bloom in endless variety of shades, *scarlets, crimsons, roses, blushes, lilacs, blues, purples,* and *white,* all of which for cutting are valuable, lasting long in water. For beds, edgings, and masses in the borders it is matchless, and may be had in bloom, weather permitting, from November to July, according to situation, locality, and time of planting.

CULTURE.—Any good soil, moderately well drained, suits the Anemone. Plant in succession *A. coronaria* varieties from October to April, the roots four to six inches apart, at a depth of two to three inches, choosing a dry day, and when the ground is in good working condition. *The plantings for Summer and Autumn-flowering should be in a situation where the ground is moist, and in shade from the sun's rays after* 10 *or* 11 *a.m., and well sheltered from cutting ground winds.* In districts which suffer badly from Spring frosts, plant from December to April.

ANEMONES, FOR BEDS AND MASSES, Barr's Double Poppy. (A. coronaria varieties.) The flowers of the **Double Poppy Anemone** resemble a semi-double Hollyhock, and are extremely handsome. When planted from October to December, they flower in succession during the early Spring months, while those planted from January to April flower in succession from April to July.

ANEMONE FULGENS, The Beautiful Starry Windflower of the Pyrenees, &c.

ANEMONE FULGENS.

This, with its rich *dazzling scarlet* flowers, and light elegant growth, is the most brilliant and graceful of all Winter- and Spring-flowering Anemones. It is invaluable for table bouquets or vases, as it lasts a long time in water. If the roots are planted early in Autumn, flowers may be gathered, weather permitting, from Christmas; its hardiness is beyond all question, so that roots may be safely planted any month from August to May, except where ground winds are prevalent, in which case plant in October and November. This brilliant flower should be used largely in wild gardens, orchards, woodlands, on half-shady banks, &c. *The plantings made April and May should be in a situation where in Summer the ground is moist, and the sun's rays do not fall on them after* 10 *or* 11 *a.m. If grown as pot-plants plunge out of doors for a time.*

ANEMONES. Various Beautiful Species. *Anemone apennina*, the blue Mountain Wind-flower, forms a dense cushion of rich blue, and is one of the loveliest of dwarf Spring flowers. Where Daffodils are naturalised this and *A. blanda* should be freely planted. *A. blanda* resembles *A. apennina* in flower, but blooms a month earlier. The varieties of *Anemone nemorosa* (The Wood Anemone) literally carpet the ground with their charming flowers ; being shade-loving plants they should be planted under trees or in shady nooks on rockwork. *A. nemorosa Robinsoniana* is remarkably beautiful. All are exceedingly charming established on rockwork, or as pot-plants.

Howellii, umbels of beautiful large white flowers, striped blue, 1½ ft. ..... ,, 7/6 0 8

,, **lilacina,** bearing in early Summer clusters of elegant tubular flowers, pale lavender tipped white, very beautiful, ht. 1 ft. *1st Class Certificate R.H.S.* per doz. 7/6 0 8

,, **splendens,** a very handsome and beautiful variety bearing large umbels of light yellow flowers.....per doz. 5/6 0 6

laxa, large rich Tyrian purple flowers, very handsome, 1 ft. ..... ,, 3/6 0 4

Murrayana, large deep violet-blue flowers .....per 100, 25/- ; ,, 3/6 0 4

peduncularis, a handsome species, bearing magnificent umbels of large china-white flowers per doz. 3/6 0 4

Purdyi, a handsome new species, of pretty dwarf habit, flowers borne in graceful umbels, soft lilac with a handsome violet bar running down centre of each petal .....per doz. 6/6 0 8

volubilis, a lovely twining species, which if supported will attain a height of four or five feet, bearing a terminal cluster of pretty delicate rose-coloured flowers ; a light covering during Winter is advisable. This plant would be charming in hanging baskets, &c.....per doz. 5/6 0 6

See also **Novelty List,** *page* 4.

BULBOCODIUM vernum, producing early in Spring a mass of bright rose-purple flowers close to the ground ; valuable for edgings, rockwork, and naturalising in grass, ½ ft....per doz. 2/6 0 3

***CALADIUM,** perhaps the most beautiful and picturesque of foliage stove plants.

12 in 12 beautiful named varieties.....15/-, 24/-, and 42/-

6 in 6 ,, ,, ,, ... 7/6, 12/-, ,, 21/-

esculentum, a handsome foliage plant for sub-tropical gardening, or for pots. If the tubers are started in heat in March they will produce nice plants ready for putting out in June ; in Autumn, at the approach of cold weather, cut down all the leaves except the centre one to within an inch or two from the crown, and a few days after take the tubers up and store in sand in a dry cool place away from frost until Spring 1 6

CALLA, or Arum Lily. *See* **Richardia.**

CALOCHORTUS, or more popularly known as the **Butterfly** or **Mariposa Tulips, Globe Tulips,** and **Star Tulips.** (*See Illustration, page* 13.) These lovely Californian bulbs, although belonging to the same Natural Order as the Tulips of our gardens, bear little resemblance to them. They flower through June and July, and for delicacy of texture and brilliancy of colour are unsurpassed ; they deserve a place in every Hardy Flower border, and for select places in the Rock Garden they are charming.

As cut flowers the Calochorti are of great value, the flowers lasting well and the buds opening readily in water ; the varieties in the *Mariposa* or *Butterfly* section are especially suitable to cut, having long stems and being profuse continuous bloomers.

They all make charming pot-plants (several bulbs in a pot) for the cool greenhouse or cape pit.

Reproduced from a Photograph taken at Barr & Sons' Nurseries.

Group of Barr's Butterfly or Mariposa Tulips (Calochorti).

See page 12.

These hardy Californian flowers are of unique beauty, and their brilliant and varied markings and delicate shadings can only be compared to those found on the most beautiful butterflies. They deserve a place in every hardy flower border and should also occupy select spots on rockwork.

Reproduced from a Photograph taken at Barr & Sons' Nurseries. (Copyright.)

Erythronium revolutum, 'Pink Beauty.' *See page* 4.

A LOVELY NEW DOG'S-TOOTH VIOLET.

ful new American Dog's-Tooth Violet was exhibited by us for the first time at the R.H.S. Show, April 18, 1899, and was much admired. The flowers are large, with gracefully reflexing petals, colour delicate pale pink with central zone of gold. We strongly recommend it t· ll lovers of hardy flowers, for planting in shady moist situations.

CALOCHORTUS—*continued.*

CULTURE OUTDOORS.—*The Calochorti are all quite hardy.* The '**Mariposa**' and '**Star Tulips**' require a sunny position and light gritty or sandy soil on slightly raised beds to insure perfect drainage; plant from September to end of November, 2 to 3 inches deep, and 3 inches apart. Cover the beds after planting with straw or cut heather, to keep surface sweet and as a protection in case of early growth; remove the covering in March. A position facing south and sunny spots on the rockery are specially suitable.

When in full growth give occasional soakings of water, but not too frequently. After flowering, ripen off by placing glass over them, or take up when foliage dies down.

The '**Globe Tulips,**' being woodland plants, like partial shade and a porous soil composed principally of leaf mould.

Section I.—Butterfly or Mariposa Tulips, all of remarkable beauty with large open flowers.

	each—s.	d.
Catalinæ, *the earliest of all the Mariposa Tulips,* bearing on tall slender stems very beautiful large flowers ranging from pale to deep lilac, with a dark maroon semicircle covering base of petal ..... per doz. 6/6	0	8
clavatus, var. Eldorado, very large handsome expanded flowers of a brilliant rich golden-yellow, and lined on lower part with stiff hairs; they are borne on wiry zigzag stems from 1 ft. to 3 ft. high. **Award of Merit R.H.S.** ..... per doz. 15/-	1	6
Gunnisoni, large pure white flowers of great beauty, with a greenish hairy zone, ht. 2 ft., fine for cutting. **Award of Merit R.H.S.** ..... per doz. 4/6	0	5
Kennedyi, a desert species with flowers of a remarkably striking colour, bright brick scarlet, with black central blotches, very beautiful	1	6
luteus, beautiful bright yellow with a zone of reddish brown near base, ht. 1 ft., per doz. 2/6	0	3
,, **concolor,** flowers a very lovely clear yellow, large and open, with slight brown markings at base. **Award of Merit R.H.S.** ..... per doz. 15-	1	6
macrocarpus, a splendid species, bearing very large flowers of a beautiful pale lavender, with darker centre and banded green. **Award of Merit R.H.S.** ..... per doz. 7/6	0	8
nitidus, bearing several large very pale lilac flowers, each petal having an indigo blotch and being covered with long hairs, very beautiful ..... per doz. 8/6	0	9
Nuttallii lutescens, a lovely species with large rich cream-coloured flowers ,, 7/6	0	8
Plummeræ, of extreme beauty, bearing a branching spike of large soft lavender flowers, each petal lined with long silky golden hairs. **Floral Certificate R.H.S.**....per doz. 10/6	1	0
splendens atro-violacea, a handsome species, having brilliant purple flowers, with deep red blotch on petal, very free-flowering ..... per doz. 4/6	0	5
Venustus group—all having flowers of exquisite beauty, large and elegantly formed, valuable for cutting, ht. 2 ft.; these are all strong growers.		
,, **citrinus,** large flowers of a fine golden colour with dark crimson blotch, *of exquisite beauty*; a gem for cutting. **1st Class Certificate**.....per doz. 2/6	0	3
,, **El Dorado,** a grand new strain. *See* **Novelties,** *page* 4.		
,, **purpurascens,** a lovely variety, flowers large and outside purplisb, inside creamy white, each petal handsomely blotched, very free. **Award of Merit R.H.S.**.....per doz. 3/-	0	4
,, **robustus,** a handsome vigorous form, of easy culture, flowers varying from white with dark eye to brilliant purple with dark eye surrounded with yellow, of great size, *strongly recommended*..... .....per doz. 6/6	0	8
,, **Vesta,** a most lovely variety and one of the freest growers; flowers very large, and borne freely on long stalks, colour outside rose-purple, inside white to blush, beautifully marked reddish brown and yellow .....per doz. 4/6	0	5
Weedii, a grand variety, with large clear orange-yellow flowers, thickly lined with silky hairs, and dotted brown.....per doz. 6/6	0	8
mixed varieties of Butterfly or Mariposa Tulips in great variety. We recommend everyone to try some of these gems both in the open ground and in pots per 100, 10/6; per doz. 1/6	...	

Section II.—Globe Tulips or Fairy Bells.—These are the perfection of grace, with beautiful globular drooping flowers.

albus, bearing on branching stems, 9 to 12 inches high, several pearly white hairy flowers, which hang in pendent globes .....per doz. 2/6	0	3
amœnus, a lovely new species, bearing lovely pendent globe-shaped flowers of a beautiful rose colour, dwarf. **Floral Certificate** .....per doz. 4/6	0	5
pulchellus, bearing a quantity of golden globe-like pendent flowers, margins fringed with bair, dwarf and very beautiful; of easy culture .....per doz. 2/6	0	3

Section III.—Star Tulips. These produce dainty little open cups on slender dwarf stems, and are of exquisite beauty.

Benthami, bright yellow with dark blotch at base, and covered with yellow hairs, per doz. 2/6	0	3
Howelli, a rare and beautiful species, growing about 1½ ft. high, with large, pale, straw-coloured flowers	1	6

CALOCHORTUS.—Section III.—*continued.* each—s. d.

lilacinus, a beautiful dwarf species bearing numerous large pale lilac flowers, with or without a dark blotch, of easy culture, ht. ½ ft. .....per doz. 2/6 0 3

Maweanus, var. major, a very lovely species bearing large open cup-shaped white flowers covered with silky blue hairs .....per doz. 3/6 0 4

Purdyi (new), a valuable acquisition to our *Star Tulips* and of easy culture; it produces stems 10 to 15 inches high well furnished with large white flowers tinted mauve and green and covered inside with long hairs .....per doz. 5/6 0 6

CAMASSIA, very handsome and graceful hardy bulbous plants for flower borders and to naturalise.

Cusickii, a handsome species, forming a rosette of broad glaucous foliage, from which rise tall spikes of large pale lavender starry flowers with yellow anthers, 2 to 3 ft. ...per doz. 7/6 0 8

esculenta, pretty star-shaped blue flowers, freely produced on numerous spikes, 1½ ft. per 100, 4/6; per doz. 8*d.* ...

Leichtlini alba, bearing elegant spikes of large creamy white starry flowers and handsome dark glaucous foliage, rare, 2 ft. .....per doz. 15*s.* 1 6

Fraseri, a distinct species from California, with pretty delicate pale blue flowers, 1 ft. per 100, 15/–; per doz. 2/3 0 3

***CANNA, Crozy's New Large-flowered Dwarf Hybrids mixed:** their handsome foliage, gorgeously coloured flowers, and fine dwarf habit, render these Cannas of great value for filling beds and grouping in borders; *treatment same as for Dahlias,* per 100, 40/–; per doz. 5/6 ...

Crozy's New Large-flowered Named Varieties (*for descriptions see* **Spring Bulb List**).....per doz. 7/6 ...

CHINESE SACRED LILY. *See* Narcissus, *page* 45.

CHIONODOXA (Glory of the Snow). The **Chionodoxa** is one of our earliest Spring flowers, and its beauty in very early Spring is unsurpassed. It should be largely planted in all borders and dotted over all bulb beds. Once planted it comes up year after year and *never* need be disturbed; when thus left the flower spikes increase in size and beauty each year. If grown in pots and jardinets the Chionodoxa may be had in bloom early in January, but should be brought on in a cold frame or cool greenhouse close to the glass. When associated with *Narcissus minimus,* the effect is charming, as both flower at the same time. *For an immediate effect* plant the bulbs close together.

CHIONODOXA LUCILIÆ

Chionodoxa Luciliæ (The Glory of the Snow), unsurpassed for edgings and masses in flower borders and on rockwork: colour *deep Nemophila-blue, with clear snow-white centre.* We were awarded a **First-Class Certificate** for this lovely flower by the R.H.S.

per 1000, 30/–; per 100, 3/6; per doz. 6*d.*

extra selected bulbs,

per 1000, 40/–; per 100, 4/6; per doz. 8*d.*

,, **imperialis (new),** a grand acquisition, flowers twice the size of *C. aurea*, and of a fiery orange colour, a tall and vigorous grower, exceedingly showy..... per doz.	15/-	1	6

CROCUSES.

The Crocus is one of the earliest flowers of Spring, and occupies a deservedly prominent place in every garden. Planted as an edging in triple lines of one or more colours, the effect is striking. No Spring display surpasses that of broad wavy bands of golden-yellow, striped, purple, or pure white Crocuses, when they expand their blossoms in February and March. In lawns and pleasure parks, planted in the grass, the Crocuses are extremely effective. For several years past in the **London Parks,** Crocuses, Snowdrops, Daffodils, &c., have been planted in the grass, to the great delight of visitors. In wild gardens, woodland walks, &c., the Crocus should be associated with the violet, the primrose, and the oxlip.

When planting Crocuses outdoors plant as *shallow as possible*, barely covering the bulb; many amateurs plant too deeply, which is often the cause of failure in their blooming.

BARR'S CHEAP SHOWY CROCUSES for Large Plantings.

To encourage extensive planting in shrubberies, woodlands, wild gardens, in grass, on lawns, pleasure parks, &c., these Crocuses are quoted cheaply by the thousand. For a gorgeous effect in early Spring nothing can equal the **Golden Yellow Crocus,** large masses of which attract the eye at a great distance.

BARR'S CHOICE NAMED LARGE-FLOWERED CROCUSES.

Large Roots for Pot-Culture and Flower Beds, &c.

The following large-flowered named Crocuses are recommended for planting in groups, edgings, select beds, and in designs. *To obtain the finest effect the bulbs should be planted half an inch apart.* **When grown in pots,** plant thickly, and plunge pots in ashes only up to the rims. When removed from under the ashes, place in an airy situation, and give water very freely at the roots. **A** charming effect is obtained by growing **Crocuses in shallow saucers of water** (the bulbs touching one another), and this may be accomplished in an ordinary sitting-room.

BARR'S AUTUMN-, WINTER-, AND SPRING-FLOWERING SPECIES OF CROCUSES.

Our collection of these Crocuses consists mostly of wild species, many of which were collected by George Maw, Esq., in Greece, Syria, Palestine, &c.; they cannot fail to be acceptable for rockwork and other select places, where they may be seen to advantage. Our collection of Crocus species is the most complete one existing.

CROWN IMPERIAL

The Crown Imperial (Fritillaria imperialis) is a stately hardy border-plant, very effective in Spring. Its tall stem terminates in a cluster of pendent bell-shaped flowers, surmounted by a whorl of fresh green leaves. For forming bold groups in the permanent border or on lawns it is of great value. To obtain the best success plant the bulbs in September and by preference on their sides, to prevent moisture accumulating in the centre.

CYCLAMEN FOR GREENHOUSE (C. persicum).

BARR'S LARGE-FLOWERED DWARF STRAIN FOR GREENHOUSE OR SITTING-ROOM DECORATION.

These beautiful Cyclamens are a great improvement on the old strain ; the flowers are large, of rich and delicate colours, and stand well above the handsome foliage ; the plants are of dwarf and compact habit.

Plants in Pots, set with bud or in bloom, *supplied from September to December*—
per doz. 15/-, 21/-, 25/-, and 30/- ; each, 1/6, 2/-, 2/6, 3/6, and 5/6, according to size.

Seed of Barr's Prize Strain of Cyclamen persicum for November sowing,
per pkt. 1/6 and 2/6.

CYCLAMEN. Hardy Species for Rockwork Out-of-Doors.

These **Hardy Cyclamen** require perfect drainage, and shelter from the cutting winds of March and April, and the hot rays of the Summer sun ; at the bottom of old walls facing north and on rockwork they are very beautiful : or nestling in the grass, near the roots and under the shelter of old trees, the effect is most charming. In making up a soil for them add a liberal proportion of old lime or mortar rubbish and some old peat or leaf soil. *C. Europæum* is fragrant, and commences flowering in July. *Ibericum* and *Coum* varieties bloom from December to March ; *Repandum* closes the Cyclamen season in April. *Repandum* and *Africanum* should be planted in warm protected situations on rockwork, and covered with cut heather, straw, or a few light boughs, to keep off cutting ground winds till March.

Cyclamen neapolitum is perfectly hardy, and is covered with bloom during September, while throughout Autumn and Spring its large and beautifully variegated leaves render it valuable for Winter beds, intermixed with Scillas, Chionodoxas, Leucojums, Miniature Daffodils, Snowdrops, Muscaris, &c.

strong flowering roots several years old 12 6

ERYTHRONIUM (Dog's-Tooth Violets). In Spring there is no prettier sight than a mass or edging of Dog's-Tooth Violets, with their prettily variegated foliage and graceful Cyclamen-like flowers, ranging in colour from deep purple to the purest white. Naturalised in grass they present a charming picture. The large handsome American varieties indicated by † are strongly recommended for choice positions in the rock-garden or for pot-culture; they all prefer a partially shaded and moist situation. When planting, cover with sand.

FRITILLARIA, an extremely elegant family of hardy plants, bearing graceful drooping bell-shaped flowers in May. The large-flowered varieties are charming for grouping in borders and for clumps on rockwork ; the smaller-flowered dwarf kinds for select nooks on the rockery. They are all essentially shade-loving plants, and a little sharp sand placed around the bulbs at time of planting is very beneficial. All make very pretty pot plants (several in a pot) for greenhouse decoration.

The '**Snakeshead Fritillarias**' (*F. meleagris vars.*) have large graceful bell-shaped chequered flowers ; they are of easy culture, and are very effective in groups on rockwork, flower border, or naturalised in grass ; they also make charming pot-plants.

GALANTHUS (Snowdrop)

In the early Spring months, there is nothing more beautiful than a sheet of the snowy graceful blossoms of the Snowdrop. In planting, the bulbs should almost touch each other. An effect of surpassing beauty may be obtained with Snowdrops associated with Scillas sibirica, or bifolia, Chionodoxa Luciliæ, C. sardensis, or C. gigantea. When practicable such plantings should be permanent, and the surface of the soil top dressed in Summer and sown with annuals, such as Nemophila, Leptosiphon, &c., or planted with surface rooting bedding plants. The Snowdrop and the Crocus when planted in alternate circles are very effective, and follow each other so closely that no gap is left in the succession.

The Snowdrop looks charmingly at home when nestling in grass, on hedge banks, &c. The turf need not be disturbed, but holes about three inches apart and five inches deep should be made with a dibber, dropping in three inches of fresh soil, then three or more bulbs. *The Giant Single Snowdrop*, Galanthus Elwesii, *should be extensively used; its flowers are large and valuable for cutting.* In its native habitat it is found growing with the Chionodoxa, and the effect of the two together is lovely.

Permanent plantings of Snowdrops should be made always in the shade as far as possible.

GLADIOLI, Early-flowering, for Autumn and Winter Planting.

These beautiful **Early-flowering Gladioli** are greatly prized as cut flowers from May to July for filling vases, &c., and on this account, as also for the fine effect they produce in the flower garden, they should be largely planted. G. Colvillei, **The Bride**, is exceptionally valuable, and is extensively grown in pots to cut during April, May, and June for Covent Garden Market. All these early Gladioli may be grown in pots for indoor decoration.

CULTURE OUTDOORS.—Select a sunny situation protected from cutting winds. Trench the ground deeply, working in plenty of rotten manure in the underspit; and plant from end of October to January at a depth of four to five inches. *After planting cover with long straw litter or other light material, which remove in March.* If the Summer is dry and the weather hot, an occasional good soaking of water or liquid manure will prove beneficial.

CULTURE FOR CONSERVATORY DECORATION.—Plant three to five bulbs, according to size, in a 5- or 6-inch pot, and plunge in ashes in a cold frame or pit, withholding water till the bulbs have started into growth; or, the pots may be buried in ashes out of doors, and remain undisturbed till ready to remove indoors.

BARR'S CHOICE NAMED HYACINTHS.

FOR CULTURE IN GLASSES, JARDINETS, POTS, AND FOR EXHIBITION.

CULTURE IN POTS.—The best soil to use is a compost of good fibrous loam with a liberal addition of leaf-soil, sharp sand, and well-decayed cow manure. The whole should be well mixed and left to stand some time before being used.

In potting, leave the top of the bulb just exposed, and let the soil be in a nice friable state and not too moist. The pots should then, at once, be placed outdoors on a bed of ashes, and covered with six inches of the same material, or cocoa fibre, and left exposed to all weathers. *When the bulbs have well rooted*, and about an inch of the top growth has been made, they may be removed indoors, first into a subdued light until the blanched foliage has attained its full green colour, and then into the sunniest situation at command in the greenhouse or conservatory. Abundance of air, a moderately moist atmosphere, and plenty of water at the roots are then necessary for early, well-developed flower spikes. *A dry or frosty atmosphere or a draughty situation* will cause the flower buds to shrivel. *Forcing should only be done gently*, the temperature not exceeding 60 degrees. A too frequent fault made in forcing Hyacinths is that they are subjected to heat before the bulbs are fully rooted.

For earliest flowers—namely, for January and February—pot middle of September and leave in the plunging bed 10 to 12 weeks. (*See special note for this year's treatment, page* 28.)

☞ If finely developed trusses and rich colours are preferred to very early flowers, **the Hyacinth** should not be forced ; pot up the bulbs middle of October and leave them plunged out-of-doors three months or more, according to season, then remove them to a mild temperature like that of a cool greenhouse, a sitting-room window, or frame, always selecting the sunniest and most genial situation.

CULTURE IN GLASSES.—Pure clear water (rain water by preference) should be used with a piece or two of pure wood charcoal in it to keep the water sweet. The base of the bulb should at all times just touch the water. Place the glasses in a *cool dark place* to encourage root growth. When the glasses are nearly full of roots admit them to the light gradually, and then to the sunniest place at command till the flower spikes are well developed. *Avoid a too dry or frosty atmosphere or a draughty situation*, as such conditions will often cause the flower buds to shrivel up. *Barr's Mixture of Cocoa Fibre and Charcoal* is an excellent material for growing Hyacinths in, and is clean and inoffensive to handle (*see page* 64 *for directions*).

CULTURE IN JARDINETS.—For this purpose *Barr's Mixture of Cocoa Fibre and Charcoal* is undoubtedly the best material to use. It should be always kept moist, and when the jardinet is removed to the sitting-room the surface should be covered with fresh green carpet moss. Grown in jardinets, **Hyacinths** are charming when associated with early Spring-flowering bulbs like **Chionodoxas, Scilla sibirica, Snowdrops, Tulips, Crocuses, Narcissi, Iris reticulata, &c.**

BARR'S NEW 'PRIZE-WINNING' EXHIBITION HYACINTHS.

A very careful selection of a few of the finest Hyacinths for Exhibitors.

We have selected these varieties out of many hundreds, as being specially suitable for exhibition on account of their grand spikes of fine form, their large bells and beautiful colours. Several of them will be little known to the public, being new varieties showing great advancement on existing kinds. *We simply give the colours, as they are all of highest excellence* as to form and size. Most of them have been awarded prizes and certificates of merit.

BARR'S
GENERAL COLLECTION OF NAMED HYACINTHS.

BULBS THE FINEST OF THIS SEASON'S CROP.

☞ Owing to the unfavourable weather experienced in Holland during last Spring, Hyacinths received a slight check in their growth, and in consequence we do not recommend any *forcing* in pots or glasses THIS SEASON, but the bulbs should be grown slowly and steadily, in fact almost cold in order to ensure the usual fine results. If grown in glasses keep them in the dark a few weeks longer than usual before removing to sitting-room or conservatory.

The varieties of Hyacinths described below, and included in the following selections, we have personally selected during our many visits of inspection to the Finest Hyacinth Farms in Holland, and experience has proved them the most worthy of cultivation.

BARR'S POPULAR SELECTIONS OF NAMED HYACINTHS.

Sonora, rosy salmon, good compact truss... 0 6
Van Vondel, beautiful soft chrome-yellow, large handsome truss..... 0 10

BARR'S 'Extra Selected' HYACINTHS for BEDDING.

The following Hyacinths are of an extra selected quality and far superior to what are commonly sold as **'Bedding Hyacinths'** at lower prices. The varieties selected are those having large erect well-formed spikes of uniform height and rich brilliant colours, and only differ from the named Exhibition Hyacinths in the bulbs being a shade smaller in size. They may also be used with advantage for filling flower boxes, rustic baskets and vases, &c. As some varieties open a little earlier than others, we have classified them into two sections—(1) Those which commence to flower first and about the same time, and (2) those which come to perfection a little later, and bloom about the same time. We trust this arrangement will be of assistance to purchasers in making their selection. *Owing to the unfavourable weather experienced in Holland last Spring, good bulbs of Hyacinths are scarce and the supply limited.* Orders should therefore be sent in early.

SECTION I.—Varieties coming first to perfection, and which may be bedded together.

per 100 per doz.

Barr's Early Blush-Rose ..... 27/6 ... 4/-
Barr's Early Rich Deep Rose 27/6 ... 4/-

BEDDING HYACINTHS OF ORDINARY SIZE.

We can supply these in separate colours at **22/6 per 100; per doz. 3/-**

BARR'S BEAUTIFUL 'RAINBOW' MIXTURES OF HYACINTHS,

FOR FILLING BEDS AND PLANTING IN BORDERS, &c.

'Barr's Beautiful "Rainbow" Mixture of Hyacinths.' These are grown specially for us on one of the large Hyacinth Farms in Holland, and are unsurpassed for quality. Every Spring brings us numerous letters expressing satisfaction with the grand effect produced by these Hyacinths. The colours are judiciously blended, including *red, scarlet, purple, lavender, porcelain, azure-blue, white, rose, blush, &c.*, producing a magnificent effect in flower beds and borders. Purchasers cannot fail to be pleased with them

BARR'S MINIATURE HYACINTHS for Children's Gardens, &c.

In *children's gardens* and small flower-beds, or as front edgings and ribbons, these **Miniature Hyacinths**, alone or intermingled with other dwarf Spring-flowering bulbs, make a fine display throughout the Spring months.

They are also valuable for growing in small glasses, fancy pots, old china bowls, crystal dishes, jardinets, &c., alone or associated with Scilla sibirica, Chionodoxas, Crocuses, Snowdrops, Dwarf Tulips, and Daffodils, Iris reticulata, &c.

Barr's Special Mixture of beautiful colours, per 100, 10/6 ; per doz. 1/6

ROMAN HYACINTHS.

BARR'S 'EXTRA EARLY' WHITE ROMAN HYACINTH.

These **Extra Early White Roman Hyacinths** have been grown *specially* for us in a warm climate, and have thereby gained a superiority over the *French-grown Roman Hyacinths* in flowering a fortnight or three weeks earlier and in blooming more freely. *We can strongly recommend them.* The elegant little sweet-scented flower spikes may be had in bloom during October, November, and December, if the bulbs are potted up early and forced in succession. They are greatly prized for bouquets, while the individual flowers are of great value for buttonholes. (*For Cultural Directions see page* 1.)

IRISES. These may be called the **'Orchids' of the flower garden,** their blossoms competing in richness and variety of colour with the choicest and the most beautiful Orchids. They should be extensively planted in flower and shrubbery borders, and naturalised ; a judicious selection will give a display of bloom from Christmas to August. *See our Hardy Plant Catalogue* for all kinds of Flag Irises.

BARR'S June-flowering ENGLISH IRIS.

(THE LARGE-FLOWERED BULBOUS IRIS OF THE PYRENEES.)

These magnificent Irises thrive in any ordinary garden soil ; when the soil is very heavy, surround the bulbs with sand, and see well to drainage. The earlier the planting, after beginning of September, the greater the success, although the bulbs may be put in as late as December. The varieties contained in our collection we have specially selected as being the finest and most distinct, and they will be found as *strikingly beautiful and varied in colour as the most sumptuous Orchids of the hothouse.* They flower in June, thus **succeeding the Bearded Flag Irises.** As cut flowers they take a first place.

☞ **Our Annual Exhibits** of cut flowers of these grand Irises at the London Summer Shows and at King Street, Covent Garden, attract much attention and elicit great admiration.

BARR'S June-flowering SPANISH IRIS.

(THE ORCHID-LIKE BULBOUS IRIS OF SPAIN.)

(*See Illustration on page* 41.)

The Spanish Irises flower a fortnight before the English, and differ from them considerably, the colours of the flowers being showier and more varied. The curious and charming blendings of shades in the same flower give them the appearance of many of our rare orchids, with which they can well compete in grace and beauty. For vases and bouquets the cut flowers are greatly prized, as they last long when cut, and the buds open well in water. For filling flower beds and massing in borders these elegant Irises are of the greatest value. They will also bear very gentle forcing in pots. The varieties contained in our collection are the *finest* and *most distinct in cultivation.* The cultural treatment is the same as for the English Iris, while they will thrive either in an open or partially shaded situation.

☞ **Our Annual Exhibits** of cut blooms of these beautiful Irises form a great feature of attraction.

IRIS, Various Beautiful Bulbous and Tuberous-Rooted Species.

TWO BEAUTIFUL CUSHION IRISES

No. 1, I. NIGRICANS. No. 2, I. BISMARCKIANA.

These Iris Species are all hardy and beautiful, flowering one after the other from November to June. The dwarf early species will be more enjoyed if planted on rockwork, where the flowers could be a little proteeted from heavy rains. *Alata*, *Reticulata var. Histrio* and *Histrioides*, *Vartani*, and *Unguicularis* (*Stylosa*) *vars.*, are charming Winter-flowering species, followed in February by *I. reticulata*, with its lovely violet-scented blossoms, the sweet-scented *I. persica*, the beautiful and lately introduced species *I. Rosenbachiana*, *Bakeriana*, and *Danfordiæ*. Next in succession come the interesting *Caucasica*, *Orchioides*, the eurious Snakeshead Iris *tuberosa*, and the new species *I. Sindjarensis* and *assyriaca*. These are followed closely by *Susiana*, *Iberica*, &c., with their large handsome beautifully netted flowers ; along with these, *I. Atrofusca*, *Atropurpurea*, *Bismarckiana*, *Gatesii*, *Lorteti*, *Lupina*, and *Helenæ* surpass in . beauty and interest any written description that can be given of them. The charming dwarf Iris *flavissima Bloudovii*, the pretty Peacock Iris (*I. pavonia*), and the beautiful Iris *cristata* flower in May, and are followed in June by the *Irises junceа*, *Boissieri*, *lusitanica*, and *tingitana*.

Culture.—The Irises marked † in the following list belong to the *Oncocyclus* and *Regelia* sections **(Cushion Irises)**, and are remarkable for their great beauty. Plant the roots in December (the tops not more than 1½ inches below the surface) in a light *well-drained* soil (without manure), and cover with three or four inches of wheat straw or, better still, marsh reeds, or cut heather, which remove in March. Immediately these Irises have done flowering place over the plants a light, or panes of glass elevated eighteen inches above the ground, so as to admit at the sides a free entry of air, and at the same time to keep off rain till October. The object desired is to thoroughly ripen the roots, and prevent their starting into growth too early. The covering in Winter is to keep off heavy rains, and discourage a premature growth. Or the roots may be lifted four or five weeks after they have done flowering, and stored on a *dry* sunny shelf or in *perfectly dry* sand till December, when replant. *The great beauty of these Irises, especially when seen in established masses, will fully repay the special treatment they require.*

The Irises marked * belong to the *Juno* section, and thrive best planted in shallow sandy soil with a light dressing of old manure.

A beautiful Coloured Plate of Oncocyclus Irises, **Gatesii, Lorteti,** *and* **Lupina,** 6*d.* *Another Coloured Plate of Irises,* **Atrofusca, Bismarckiana, Atropurpurea,** *and* **Helenæ** (Mariæ), 6*a.*

Vartani, a pretty little species found near Nazareth, flowers azure-blue, in Nov. or Dec., ht. ½ ft. 0 8

For Beautiful Flag Irises, Tall Bearded, Dwarf, and Japanese, &c., *see our Plant Catalogue.*

ISMENE CALATHINUM. *See* **Hymenocallis.**

IXIA.—The African Corn Lily, a graceful slender growing plant, with long loose spikes of bloom. The colours are rich, varied, and beautiful, the centre always differing in colour from the other parts of the flower, so that the blossoms expanding in the sun's rays present a picture of *gorgeous beauty.*

CULTURE IN POTS.—From October to January plant five or six bulbs in a four- or five-inch pot, using a compost of turfy loam, leaf soil, and silver sand. Make the soil firm about the bulbs, then plunge the pots in ashes in a cold pit or frame, and withhold water till the plants appear, and at first give sparingly. When the plants are in growth, the lights should be left off except during wet or frosty weather. Early in February, or when the plants have made sufficient growth, remove them to the greenhouse, keep close to the glass, and carefully attend to the watering.

CULTURE OUTDOORS.—Plant from November to January, at a depth of three inches, and the bulbs two inches apart, on raised beds, in a prepared light loamy soil, in a sunny situation, protected if possible from cold east and northerly winds. When planting cover the bulbs with coarse sand. A covering of straw, litter, heather, or other light material will protect the early top growth from frosty winds, but it should be removed in March.

Barr's 'Rainbow' Mixture of Ixias in great variety of gorgeous colours, for filling beds and massing in sunny borders .....per 1000, 25/–; per 100, 3/6; per doz. 6*d.* ...

☞ **The following varieties of Ixias are the most distinct and beautiful in cultivation.**

	per doz.—*s.*	*d.*
Azurea, azure-blue, violet centre.....	3	6
Beauty of Norfolk, canary, centre black	1	6
Bucephalus, rich claret-colour, beautiful	1	0
Conqueror, yellow, shaded red	1	0
Crateroides, rich cerise-scarlet, early, and greatly valued for cutting, per 100, 4/6	0	8
Donnatello (new), large, flowers brick-scarlet, brown centre, a most lovely colour	2	6
Elvira, French grey, violet centre	2	6
Emperor of China, rich yellow, centre black, a grand handsome variety.....	3	6
Erubescens major, deep rose-carmine, black centre, beautiful	1	6
Excelsior (new), large, handsome crimson scarlet	1	3
Golden Drop, golden-yellow, dark centre	1	0
Humbert, very large, coppery rose, black centre, beautiful and distinct	2	6
La Favorite, primrose, crimson centre...	1	3
Lady Slade, beautiful rose-pink, carmine centre	1	3
Longiflora. *See* **Morphixia,** page 44.		
Magnifica, handsome, rich deep yellow, chocolate centre.....	1	6
Magnum bonum, large, white with blue centre	1	3
Nitens, intense deep magenta, handsome .	1	6
Proestans, ruby-crimson, beautiful	1	6
Queen of Roses, beautiful bright rose, large double flowers	3	6
Viridiflora, sea-green, black centre, distinct and beautiful	5	6
Vulcan, orange-red, black centre.....	1	6
White Queen, the largest pure white Ixia, with velvety crimson centre.....	2	6

As beautiful companion plants to the **Ixia,** we recommend the **Morphixia, Sparaxis, Tritonia, and Babiana.** These all reouire the same treatment as the Ixia.

each—*s.* *d.*

IXIOLIRION tataricum (Pallasi), an elegant hardy bulbous plant, bearing umbels of beautiful deep blue tubular flowers, thriving in a good light soil and an open dry sunny situation, ht. 1½ ft. ....per 100, 8/6; per doz. 1/3 0 2

JONQUILS, SWEET-SCENTED.

The Double and Single Jonquils are prized for their graceful sweet-scented flowers in or out of doors. For indoor decoration three to six bulbs should be grown in a 4- or 5-inch pot, and cultivated the same as the Hyacinth in all respects, whether for early flowering or succession. If planted also outdoors and treated the same as Daffodils, a long succession of these deliciously scented flowers for indoor decoration may be maintained.

per doz.—*s.* *d.*

Single Jonquil, rich full yellow per 1000, 21/-; per 100, 2/6 0 5

LEUCOJUM (Snowflake), Spring-, Summer-, and Autumn-Flowering.

Leucojum vernum, the **Spring Snowflake,** is one of our earliest and most beautiful Spring flowers, the blossoms of which, resembling a large Snowdrop, are handsome in outline and elegant in bouquets. *L. æstivum* and *Hernandezii,* the **Summer Snowflakes,** flower in April and May, and are remarkable for their elegant blossoms. *L. autumnale* is a charming white, pink-tipped fairy-like Snowflake, blooming in August and September; it is best planted in pure sand. *L. trichophyllum* resembles *Autumnale* in its graceful flowers, but blooms in Spring; plant in pure sand, and give cold frame treatment, keeping it well moist while in growth. They all delight in shady situations.

each—*s.* *d.*

autumnale (Acis), white and pink flowers in Autumn, graceful in pots and on rockwork, &c., ½ ft.; grow in pure sand in shade; quite hardy .....per 100, 12/6; per doz. 2/- 0 3

trichophyllum (Acis), pure white, a rare and beautiful Spring-flowering species; grow in moist sand, give cold frame or cool greenhouse treatment..... .....per doz. 2/6 0 3

BARR'S BEAUTIFUL HARDY LILIES.

FOR PLANTING IN BEDS, BORDERS, AND FOR GREENHOUSE DECORATION.

THE LILY, for variety of colour, chasteness, and beauty of form, is matchless amongst hardy plants. The flowering commences in May, and a continuous unbroken succession of bloom, from species of different countries, is maintained till the frosts of Autumn destroy the last unexpanded flower buds.

CULTURE OUT-OF-DOORS.—In choosing a situation for planting, *perfect drainage,* natural or artificial, should be the first consideration. The borders of Rhododendron and Azalea beds, and suchlike positions, are generally suitable for Lily culture, as the necessary compost for the particular species can easily be given, and the shelter from the surrounding branches is beneficial in protecting the plants from cold winds in Spring, and also affording a partial shelter from the sun's rays in Summer. Sheltered spots in mixed

herbaceous and shrubbery borders will also do. In preparing the ground, loosen the soil to a depth of several feet, and add fresh loam, coarse sand, and *sweet* decomposed leaf soil, or good peat, care being taken that the *soils are as free as possible from insect life*, and the compost sufficiently friable. Plant the bulbs 4 to 6 inches deep (except where otherwise stated), and they may then remain undisturbed for many years. The bog or swamp-loving Lilies **Superbum**, and the varieties of **Canadense** and **Pardalinum**, require a moist but sweet soil and rather shady situation; they are admirably adapted for growing amongst Rhododendrons and Azaleas in moist situations, and for the sides of brooks, ponds, rivulets, &c.

All Liliums are shade-loving plants; their favourite aspect is a north-westerly one.

CULTURE INDOORS.—**THE LILY** being a free rooter requires plenty of pot-room, therefore use in most cases a 6- or 8-inch pot for one bulb, according to its size; a compost of fibrous loam and sweet decomposed leaf soil, with plenty of coarse sand or a mixture of good peat, loam and sand suits the Lily best. *See that the drainage is perfect and the inside of the pot clean, to start with.* Pot firmly, barely covering the top of the bulb, and leaving room to add more soil when the surface roots appear. Select a situation out of doors, protected from the afternoon sun, and stand the pots on a bed of ashes raised above the general level to avoid stagnant moisture, and make firm to prevent the entrance of worms; then cover with 6 inches of cocoa-nut fibre or old leaf soil to keep off excessive rains. When top growth begins to show above the covering, remove the pots to a cold frame, pit, or greenhouse, and start giving water sparingly; a little *clear weak liquid manure given twice a week* when the flower-buds are well advanced will greatly assist in the development of fine blooms. A north wall or hedge is a suitable situation for starting the bulbs. If very early flowers are required the Lily may be started in a *gentle* heat as soon as potted, but as soon as top growth shows itself the plant must be kept as near the glass as possible to prevent it from being drawn. **Superbum** and the varieties of **Canadense** and **Pardalinum** prefer for soil a moist sandy peat, but will also thrive in any good fairly moist but sweet soil.

☞ To those desiring further information regarding **Lilies**, we recommend Dr. Wallace's **'Notes on Lilies'** (*price* 5/- *by post*).

***Auratum (The White Golden-rayed Crimson-spotted Hill Lily of Japan).** This is indeed the **Queen of Lilies**, and should have a place in every garden and greenhouse. It is of simplest culture and perfectly hardy.

LILIUM AURATUM.

Those who have beds of Rhododendrons should plant this grand Lily freely amongst them for a succession of flowers. Growing amongst Pæonies, and along the margins of evergreens, clumps of **L. auratum**, 6 to 12 bulbs in a clump planted 3 to 6 inches apart, produce a grand effect. As isolated subjects on large lawns, groups of **Lilium auratum** look very handsome and stately. A situation should be chosen where the plants are sheltered from cutting winds and screened from the midday sun. *We are expecting our first consignment of this beautiful Lily to arrive in December from Japan, and we are booking orders for delivery immediately on arrival, at the following moderate prices.*

Splendid Large Bulbs, producing an abundance of flowers, 12 for 10/6, 25 for 20/-, 50 for 38/-, 100 for 70/-

Good-sized Bulbs, producing numerous flowers 12 for 7/6, 25 for 14/-, 50 for 26/-, 100 for 50/-

Smaller Bulbs, but of good flowering size 12 for 5/6, 25 for 10/- 50 for 19/-, 100 for 36/-

A few Special Monster Bulbs, 1/6 and 2/- each.

***LILY OF THE VALLEY, for Forcing, and making Plantations out-of-doors.**

The **clumps** of Lily of the Valley quoted have been specially prepared, and cannot fail to give abundance of flowers. In potting, the crowns should be a little below the rim of the pot, and covered with cocoa fibre, which should be removed when the crowns show through; *tight potting* is of great importance, and care should be taken, in the *first watering*, that the moisture penetrates to the *centre of the clump*. The **Berlin Crowns** are extensively used for forcing by

Reproduced from a Photograph taken at Barr & Sons' Nurseries.

Group of Barr's Spanish Irises.

See page 32.

Few flowers are so valuable for cutting as the Spanish Irises. Their long stems and delicate colours render them indispensable for vases and bouquets; they last long in condition when cut, and the buds open well in water. For beds and borders they can be strongly recommended, being very decorative and of simple culture.

Reproduced from a Photograph taken for Barr & Sons. (Copyright.)

Fortin's Giant-flowered Lily of the Valley.

See page 5.

The finest Lily of the Valley in cultivation, producing remarkably large handsome bells on long sturdy stalks.

***LILY OF THE VALLEY**—*continued.*

the growers for Covent Garden Market; of these, 15 to 20 may be planted in a 5-inch pot. For **Lily of the Valley beds**, also for massing in north borders, and to naturalise in woods, copses, &c., the **selected Dutch Crowns** are the best. Out-of-doors the Lily of the Valley likes a partially shaded and moist situation, and a good light soil. Plantations of Lily of the Valley should receive annually in March a light dressing of old manure.

DIRECTIONS FOR FORCING.—A *moist atmosphere, with a temperature of 80 to 85 degrees, and abundance of water*, is necessary to success in forcing Lily of the Valley; to encourage simultaneously the development of flower and foliage, place the pots in a shady damp part of the house, or invert a flower-pot over the crowns, till the flower and the foliage have made some progress, when remove to a less shady situation. If they are grown in a dry atmosphere, or get *an insufficient supply of water at the roots*, the crowns, technically speaking, go 'blind.'

NARCISSUS BUNCH-FLOWERED, OR POLYANTHUS NARCISSI.

ALL VERY SWEET-SCENTED.

The Polyanthus Narcissi produce large heads of sweet-scented flowers, and are specially adapted for Winter and Spring decoration in pots and jardinets. The effect is greatly enhanced when three bulbs are grown together in a 6- or 7-inch pot. The culture is the same as that of the Hyacinth. For flower beds and mixed borders, the Polyanthus Narcissi are great favourites, and produce a beautiful effect. Plant in October or November, but at the approach of winter give a light covering of long litter or other material to keep off severe frosts; remove the covering in March.

Where flowers are in demand in November, December, and early in January, the Paper White 'Early Snowflake' and Double Roman Narcissi are of great value for forcing with the Roman Hyacinths (see Culture, *page* 1).

THE SACRED, OR GOOD LUCK LILY of China and Japan.

Called by the Chinese, 'Jos Flower,' or 'Flower of the Gods,' and 'Water Fairy Flower.'

This is a species of Polyanthus Narcissus we annually import from Northern China, and is prized for the abundance of its flowers and marvellously rapid growth. The flowers are white, with yellow cup, and very fragrant; they are mostly single, but a few doubles are sometimes found amongst them. Each bulb produces several flower spikes, bearing many flowers. In China and Japan the bulbs are grown in the living rooms in fancy bowls filled simply with *pebbles and water*, and the natives compete with one another in growing the finest specimens for their New Year's Festival, successful culture being regarded as an emblem of 'Good Luck.' The bulb in this country can be grown as successfully as in China, and it is most interesting to watch its rapid growth, which is somewhere about 20 inches in forty days; place in a sunny window by day and on a table near the fireplace by night, as frost destroys the flower buds. The natural atmosphere of a warm greenhouse suits this flower well, and we can strongly recommend it to FORCE FOR CHRISTMAS DECORATION. *Fuller particulars of culture sent with the bulbs.* Orders now booked for immediate delivery on arrival, which we expect to be early in October.

RANUNCULUS, Turco-Persian, Turban and Persian.

Nothing produces a brighter or more gorgeous effect in May and June than beds of Ranunculus, the flowers are all good for cutting, and the culture is very simple. They will grow in any ordinary flower border enriched with manure.

CULTURE.—Plant from October to February, 3 or 4 inches apart, selecting a dry day; press the tubers firmly into the soil, *claws downwards*, and cover them with sand, then with soil, keeping the crown of the tuber two inches under the surface. After planting, cover the ground with *long straw, cut heather, or other light material*, which remove in March. In April and May, during dry weather, water the beds freely; a plentiful crop of fine flowers will be the result. If grown as pot-plants put three tubers in a 4-inch pot, and plunge out of doors for a time.

RANUNCULUS, Barr's Giant Turco-Persian for Bedding.

This new race of Ranunculi is remarkable for a vigorous growth and profuse flowering. The blooms are large and very handsome, in great diversity of colour. When massed in flower beds and borders, they produce a glorious effect. For cutting they are most valuable, and flowers may be gathered from the same bed several times a week, during the flowering period, without impairing the display. *s. d.*

SCILLAS.—Early-flowering. The effect in early Spring can hardly be over-estimated of the intense brilliant blue of Scilla sibirica, and the beautiful ultramarine-blue of Scilla bifolia, contrasting with the snow-white of the Snowdrop and the varied hues of the Crocus. As edgings these two early-flowering Scillas are most valuable. Grown in pots or jardinets, alone, or with other bulbs, they form a pleasing variety amongst indoor plants. In flower beds and masses the blossoms are so abundantly produced as to carpet the ground. Bifolia is the first in bloom and is closely followed by Sibirica. *All suitable for naturalisation and permanent flower borders.*

Sibirica, spikes of intense rich blue flowers, dwarf .....per 1000, 22/6; per 100, 2/6 ...

SCILLAS (Wood Hyacinths).—May-flowering. Our native species (*Scilla nutans*) abounds in most parts of the country, and many suppose it to be the 'Culver keys' referred to by Izaak Walton. The fine Spanish varieties (*S. campanulata*) have erect flower spikes and larger and handsomer flowers than our native plants, which have arching flower spikes. All the Wood Hyacinths are very effective in flower and shrubbery borders, and most valuable for wild gardens and woodlands, where they should be largely naturalised; they seed freely and quickly establish themselves. They also make charming pot-plants, and may be forced into bloom by March. *The white varieties* are greatly in demand to cut for table bouquets and vases. Wood Hyacinths should also be planted in groups in all shady flower borders and bare shady places, and odd corners which often have a desert-like appearance in the flower garden can thus be rendered bright and cheerful. Wood Hyacinths will thrive under Fir and Pine trees where few other plants will grow.

SPIRÆA (The Meadow Sweet), for Forcing or Planting out.

The large graceful feathery pure white fragrant flowers of **Spiræa japonica** and the varieties, **compacta multiflora** and **Astilboides,** are most valuable for furnishing vases, while the plants are amongst the most decorative for the greenhouse and sitting-room. In forcing, a *moist atmosphere* and *abundance of water* at the roots is necessary. **Spiræa palmata** has feathery clusters of lovely rosy-crimson blossoms, which when cut are greatly prized for vases and bouquets. **Spiræa japonica fol. aureo-reticulatis** is attractive and ornamental, and forces as easily as *S. japonica.* In *shady or moist borders out of doors,* the **Spiræas** are all very decorative plants.

	each—s. d.
Japonica...*strong clumps,* p. doz.	5/6 0 6

monster bulbs ,, 3/6 0 4

BARR'S FAMOUS TULIPS.

AWARDED MANY GOLD, SILVER, AND OTHER MEDALS AND PRIZES AT THE LONDON SPRING FLOWER SHOWS.

(*See Illustration on Back Cover.*)

Tulips are extremely hardy, and of easy culture, flowering freely in either sunny or shady situations, and developing their handsome showy flowers even in a confined town garden. By a judicious selection of Single, Double, and May-flowering Tulips, a most brilliant display of colours may be maintained in the garden from early April to end of May. In gardens where the flower beds must be kept gay from the earliest dawn of Spring, plant between the Tulips **Scilla sibirica, Chionodoxas, Snowdrops,** and **Crocuses;** these flower first, and when out of bloom the leaves form a charming green groundwork for the blossoms of the Tulip. Our **large breadths of Tulips** at the **Long Ditton Nurseries** in Spring create much comment and elicit the greatest admiration from all who see them. (*See Illustration on Back Cover.*)

BARR'S EARLY SINGLE TULIPS.

AWARDED FIRST PRIZE AT THE ROYAL BOTANIC SOCIETY'S SPRING EXHIBITION, LONDON, 1898.

Those alone who have massed the different varieties of **Single Tulips** (*planting the bulbs 4 inches apart*) can form an idea of their great beauty and the rich diversity there is in shade and colour, and the grand effect they produce grouped in flower beds or borders. **The Single Tulip** is extensively grown for indoor decoration (three or five bulbs in a pot) and *cultivated in the same way as the Hyacinth* for early flowering and succession.

The varieties of the little early **Due Van Thol Tulips** (with exception of the *scarlet-edged yellow variety*, which flowers first) bloom together, and are of the same height, which renders them valuable for beds and borders, where a very early Spring display is required, also for early forcing with the Roman Hyacinth, &c.

Hints as to the arrangement of Early Tulips in beds, &c.—A difficulty is often experienced by Amateurs in knowing what kind of Tulips to select to bed together, seeing that they are not all the same height, and that some are earlier in flower than others. For the assistance, therefore, of purchasers we have taken special observations at our Nurseries as to the heights and the order in which the **Early Single** and **Double Tulips** flower.

The Heights we give in inches, and the order of flowering is indicated by (1), (2), (3), (4), or (5) after the name. It will be noticed that the **Double Tulips** generally are a little later-flowering than the Singles. The difference in time of flowering between each number is not great, so that (1) and (2) may be bedded together, also (2) and (3), and so on. The varieties of **Due Van Thol** are not numbered, as they flower before any of the others.

Arrangement of Colours in Bedding.—The following varieties if bedded together produce charming effects: *Princess Marianne, Ophir d'Or* and *Wouverman; Pottebakker Scarlet, Pottebakker White* and *Chrysolora; Prince of Austria, President Lincoln* and *Chrysolora; Rose Grisdeline* and *Princess Marianne; Pottebakker Yellow* and *Thomas Moore; Chrysolora* and *Dusart; Princess Ida* and *Rosamundi; Duchesse de Parma* and *Fabiola; Rosamundi* and *Rose Superbe; Couleur Cardinal* makes a grand show bedded by itself, but *Snowdrift* goes well with it; *Keizerskroon* makes a fine bed with *Queen Victoria* as an outside border.

Village Beauty (2), large flower with pointed petals, brilliant salmon-rose, shaded white, beautiful, 9 in.	4 6...0	5

BARR'S DOUBLE TULIPS.

Double Tulips have massive flowers of brilliant and beautifully diversified colours, and are very effective in beds on lawns, terraces, &c., also as edgings to beds of Roses and Rhododendrons and to shrubberies. Planted in groups of five or more, they are very attractive. *Plant the bulbs four to six inches apart.*

Time of Flowering.—The numbers in brackets after the name indicate the order of flowering, and will assist amateurs in making their selections for bedding, thus :—(1) corresponds in time of flowering with (1) of the **Single Tulips** ; (2) corresponds with (2) of the **Single Tulips,** and so on. The heights, as registered at our Nurseries, are given in inches. By a judicious selection of Double and Single Tulips, a display of brilliant colours may be maintained in the garden for a long period.

Double Tulips should be planted three bulbs in a pot, and receive the same cultural treatment as the Hyacinth.

Barr's Selections for Outdoors or Pot-Culture.

BARR'S MAY-FLOWERING SINGLE 'COTTAGE' TULIPS.

SHOWY AND BEAUTIFUL FORMS OF TULIPA GESNERIANA AND OTHER SPECIES.

The name **Cottage Tulips** we have given to the following varieties on account of many of them having been discovered in very old cottage gardens in England, Scotland, and Ireland, where they have been in some cases growing for over fifty years. They are all very beautiful, and on account of their extreme hardiness are specially adapted for permanent borders, where they should be freely planted in large clumps and masses. They may also be naturalised in grass, wild gardens, &c., where in the early part of May they present a gorgeous appearance. Those who have visited **Kew Gardens** in Spring will have noticed these Tulips planted freely in grass, and also used largely in *filling flower beds* on the lawns.

For cutting they are greatly prized, as the stems are long and a free graceful effect can be readily obtained by their use.

In most cases we give the heights as registered at our **Long Ditton Nurseries.**

In time of flowering, *Elegans* and *Picotee* open first, followed by *Fulgens*, *Golden Beauty*, *Billietiana*, *Golden Crown*, *Gesneriana*, *Macrospila*, *Goldflake*, *Buenaventura*, &c., and the gorgeous **Parrot Tulips** and grand **Darwin Tulips.** A very pretty Tulip bed can be made with *T. Picotee* in the centre and *T. Golden Beauty* as a border.

PARROT, or DRAGON TULIPS, with Laciniated Petals (May-flowering).

These Parrot, or Dragon Tulips, have large characteristic blossoms with curiously laciniated petals, and richly varied shades of beautiful colours in the same flower. They are very remarkable and exceedingly showy and effective in flower borders, while if grown in hanging baskets the drooping flowers look like orchids. In height they average about 15 inches.

The following are all **selected extra strong bulbs,** *superior to what are usually sold, and may reasonably be expected to bloom, but as there is an unaccountable uncertainty in the flowering of Parrot Tulips, when used for filling beds plant closer together than in the case of other tulips, say 2 to 3 inches apart.*

12 bulbs each of the 6 Parrot Tulips described below, 10s. 6d.; 6 each, 5s. 6d.

	per doz.—s.	d.
Admiral de Constantinople, glossy scarlet, shaded and tipped orange, showy per 100, 10/6	1	6
Coffee-Colour, shaded reddish brown on a yellow ground, slightly striped crimson and green.....per 100, 12/6	1	9
Crimson Beauty, rich deep blood-crimson, with blackish markings, flowers of immense size and very handsome; this variety should be largely used in beds, borders, and baskets, as nearly every bulb flowers freely and produces a most brilliant effect. *Certificate of Merit R.B.S.*, 1897 ..... per 1000, 55/–; per 100, 6/6	1	0
Fire King, a fine new variety, dark scarlet, striped gold, distinct and remarkably handsome	6	6
Large Yellow, pure yellow, slightly striped crimson and green, a showy and beautiful flower ..... per 100, 10/6	1	6
Perfecta, golden-yellow, heavily blotched rich deep scarlet, a showy and beautiful flower.....per 100, 10/6	1	6
Barr's Splendid Mixed *from named sorts*, containing a good variety of colours **strong bulbs,** per 1000, 75/–; per 100, 8/6	1	3

BARR'S GRAND DARWIN TULIPS (May-flowering).

As grown at their Long Ditton Nurseries and exhibited at the London May Flower Shows, where their grand stately flowers elicit the admiration of all.

For flower beds and borders we confidently recommend the following **Darwin Tulips** for their stately bearing and rich colours. They have been specially selected as being distinct, showy, and beautiful, so that buyers need have no hesitation in choosing the colours they require as they are all good. The cut flowers form an elegant decoration for vases, and last a long time in water.

We have given the heights in inches, as registered at our Nurseries this last Spring.

BARR'S BEAUTIFUL 'GOLD MEDAL' ENGLISH TULIPS.

MAY-FLOWERING.

Awarded Four Gold Medals by the Royal National Tulip Society, 1896, 1897, 1898 and 1899.

These Beautiful English Tulips we can confidently recommend to amateurs for select places in the garden, and for massing in flower beds and borders. They form a valuable succession to the Early Tulips, while for symmetry of form and beauty of marking they far surpass them.

BARR'S ENGLISH TULIPS,
Representing a Breeder, a Flamed, and a Feathered variety.

Our Long Ditton Collection of English Tulips is the largest one in existence and well worth a visit in May, when the flowers may be seen in all their beauty.

☞ To those who wish to know all about the **English Tulip**, we recommend '**The English Tulip**,' a little pamphlet containing the lectures delivered on this flower at the Great Tulip Conference of the Royal National Tulip Society, held at *Royal Botanic Society's Gardens*, May 12th, 1897—namely, '*The History and the Properties of the Florist Tulip*,' by J. W. BENTLEY; '*Seed and Seedlings of the Florist Tulip*,' by the Rev. F. D. HORNER; '*The Cultivation of the Florist Tulip*,' by C. W. NEEDHAM. Price 1/-.

CULTURE OF ENGLISH TULIPS.—Any good loamy garden soil suits the '**English Tulip.**' The bulbs should be planted three inches deep and four inches apart, from the end of October to early in November, choosing a day when the ground is in nice friable condition; avoid planting when the ground is wet.

HINTS TO EXHIBITORS AND TULIP AMATEURS. As the English Tulip often suffers much from hail and wind during Spring it is a good plan to erect over the bed a skeleton framework on which a covering of calico or white canvas is fastened in February or March, leaving the sides open until the buds show colour, when the covering may be brought down over the sides too. By this means hail, rain

TULIPS (ENGLISH)—*continued.*

and very hot drying sun are kept off and the flowers open in all their purity, while the period of flowering is prolonged by some weeks. Most lovers of the English Tulip adopt some plan similar to the above, and the beauty of these lovely flowers is quite fascinating enough to repay the trouble of giving them this extra attention.

A still easier means of protection is to hoop the bed over and cover with calico, or to use garden lights, but in all cases care must be taken that the plants do not get drawn.

BARR'S ENGLISH MAY-FLOWERING TULIPS.

Barr's Choice Mixture of Beautiful English May-flowering Tulips, in great variety, comprising **Bizarres, Byblœmens, and Roses.** When massed in quantity in beds and borders these beautiful Tulips present a brilliant picture, resembling a richly coloured Persian carpet ..... per 1000, 95/–; per 100, 10/6; per doz. 1 6

Byblœmen Rectified Tulip 'Lord Denman,' a grand variety for bedding and massing, large bold flowers, beautifully marked puce-purple on a clear white ground, very effective, handsome and free-flowering ..... per 100, 10/6; per doz. 1 6

Explanation of the terms 'Breeder' and 'Rectified.'

'Rectified' Tulips are those in which the original self-colour has changed, or, as it is termed by Tulip Amateurs, broken into a flamed or feathered variegation.

'Breeder' Tulips are those with self-colours which have not yet changed from the original seedling stage, or, as Tulip Amateurs term it, broken into a variegation, but at any time they may become *Rectified.*

'Extra Selected' are specially selected flowers of superior excellence in their markings.

Those varieties offered by the dozen make attractive beds, and are exceedingly effective when grouped and massed in the permanent **Hardy Herbaceous Plant border.**

BIZARRES, RECTIFIED OR VARIEGATED.

Colours—orange, scarlet, crimson, and many shades of black and brown on a lemon, deep yellow or golden-yellow ground, with a stainless yellow centre or base.

After removing the Bulbs from plunging bed mix a little *Phytobroma* once a fortnight into the surface soil after watering (a small teaspoonful will be sufficient). 2 lb. tin, 1/-; 7 lb. 2/6; 14 lb. 4/6; 28 lb. 7/6; 56 lb. 12/6; 1 cwt. 20/- (*For further particulars see page 2 of Cover.*)

Pure Ichthemic Guano, a highly recommended fertiliser. 7 lb. 2/6; 14 lb. 4/6; 28 lb. 7/6; 56 lb. 12/6; 1 cwt. 20/- Sample packets 6*d.* and 1/-

Basic Slag, per cwt. 10/6; per 7 lb. 1/- **Genuine Crushed Bones,** per cwt. 14/- per 7 lb. 1/3.

Sulphate of Potash, per cwt. 21/-; per 7 lb. 1/9.

Soils—Loam, Peat, Leaf Soil, Silver Sand, and **Prepared Potting Soil,** per bushel, 2/6.

Cocoa Fibre, superior quality, 1/- per bushel; 4 bushels for 3/6.

Barr's Prepared Charcoal and Cocoa Fibre, for growing Bulbs in Jardinets, Glasses, &c. Fill the Hyacinth glasses with the preparation, and then add water till no more can be absorbed. In the glass place the bulb so as to rest the base on the preparation, then tie it down with brown paper as you would a jam-pot, leaving an opening in the centre of the paper for the shoot. When the bulb has well rooted the paper may be removed; care must be taken that the material in the glass is kept wet. The same remark applies to bulbs grown in vases; they must be kept in place till they have rooted. **3/6 per bushel; 1/- per peck.**

Jadoo Fibre, the new substitute for earth. It is cleanly to use, is very light, and for growing plants and bulbs (of all kinds) in hanging baskets, vases, jardinets, &c., it is said to be unsurpassed. *Full particulars and testimonials on application.* Price per peck, 1/-; per bushel, 3/6; per 3 bushels, 8/-

GISHURSTINE.—Unrivalled as a Dubbing on the Soles and Uppers of Boots and Shoes, for keeping the feet dry and warm. Tin Boxes, 6*d.* and 1/-; by post 9*d.* and 1/3.

A fuller List of Garden Requisites on application.

Special Notices.

Orders. We shall esteem it a favour if our Customers will kindly use the Order Sheet that accompanies this Catalogue, and be particular to fill in the full postal and rail address; sometimes Orders reach us without either name or address, and it is impossible to trace the senders.

Free Carriage of Bulbs. All **prepaid Orders** for Bulbs, over 5*s.* in value, will be sent **Carriage Paid.** Orders not prepaid, if over 10*s.* in value, carriage may be deducted at settlement of account.

Prepaid Orders. Besides sending **Prepaid Orders** 'Carriage Paid,' we allow **1s. in the £** (with exception of the Special Collections offered on pages 2 and 3, *which are strictly nett*), which may either be deducted by the Customer when remitting, or if this is not done, a liberal equivalent in goods will be added to the Order.

Cash Discount, 5 %. **1s. in the £** discount may be deducted from all accounts when paid within 14 days from date of invoice (excepting Collections pages 2 and 3, which are strictly nett).

Terms of Credit. Our books are made up at Christmas and Midsummer, when all accounts are due nett.

Remittances. **Money Orders and Postal Orders** to be made payable at Covent Garden Post Office; these and all Cheques should be crossed 'London and County Bank.' Small amounts may be remitted in Postage Stamps or Coin, in a Registered Letter.

Packages. **Boxes, Bags,** &c. are charged at cost price, but these may be deducted from our account if returned Carriage Paid within a fortnight. *Returned empties should have the sender's name on the address label for identification, and a notification should be sent by post, stating date of despatch and name of Railway Company.*

Catalogues. Our **Seed Guide** is published in January, **Descriptive Catalogue of Bulbs and Tubers for Winter and Spring Planting** in January, **Hardy Plant Catalogue** in February, **Daffodil** and **General Bulb Catalogues** in August. We are always pleased to forward any of these Catalogues, free of charge, to friends of our Customers on receipt of a line requesting us to do so.

Nurseries, Long Ditton. Our Nurseries are situated near to **Surbiton Station** (London and South-Western Railway). Visitors are invited during March and April to see our magnificent Collection of Daffodils in flower; in April and May, Tulips, &c.; and during Summer and Autumn to see our Collection of Hardy Perennials and Alpines, and many rare and beautiful Bulbous Plants. *Cab fare from Surbiton Station to Pound Farm entrance of Nursery is 1s.; to main entrance, which is within a hundred yards of Pound Farm entrance, 2s. Cabs are always to be had at Surbiton Station.*

Irish Orders. We shall esteem it a favour if our Customers, when ordering goods to be sent to Ireland, will kindly state the route by which they prefer them being sent.

Gardeners. We keep a special Register of Gardeners in want of situations, and shall be pleased to put such in communication with any of our Customers requiring either Head or Under-Gardeners.

Notices to Our Foreign and Colonial Correspondents.

Prepayment necessary. Owing to the difficulty of collecting accounts abroad, we beg that Customers will kindly enclose with their Orders *a remittance, a draft, or an* 'order to pay,' on a London Bank, or Agent; the remittance should be sufficient to cover cost of carriage when the freight is required to be paid in advance.

Particulars of Freight. **India.**—Seeds and Bulbs can be despatched to all postal towns in India, by **Parcel Post,** at the rate of **1 lb. for 1s., and after the first lb. 8d. per lb. up to 11 lbs.,** or by **'Eastern Express,' at 6d. per lb. up to 30 lbs., after 30 lbs. cheaper as cargo.**

Australia and New Zealand, per **'Eastern Express,' at 6d. per lb. (minimum 2s.),** or per **Parcel Post at 6d. per lb.** (1*s.* being charged for the first lb.). We recommend the **Parcel Post** to be used where possible, parcels thus sent being delivered at the Customer's house quicker, and without any additional charges.

Shipping, &c. **In Shipping Bulbs and Plants** to India, Australia, New Zealand, America, and the Cape, we exercise great care in selecting, preparing, and properly packing the same. Still there are so many contingencies that we cannot, in any way, hold ourselves responsible for the condition in which Plants or Bulbs reach their destination. *Our Customers will confer a favour if they report, on arrival, the condition of the goods.* Our experience in *successfully preparing and shipping Seeds, Bulbs, and Plants* to India and the Colonies extends over a long period.

BARR, COVENT GARDEN, LONDON.

ORDER FORM FOR BARR'S BULB AND DAFFODIL CATALOGUES.

Free Carriage of Bulbs.

All Prepaid Orders for Bulbs over 5s. in value will be sent Carriage Paid. Orders not prepaid, if over 10s. in value, carriage may be deducted at settlement of account.

PARCEL POST.—The Parcel Post offers great facilities in forwarding small packages, especially to families residing outside the radius of the Railway delivery. We shall avail ourselves of this mode of transit, *when cheapest*, and the articles ordered weigh under eleven pounds, and admit of being packed for safe transmission by '*Parcel Post*.' Heavy packages we shall send by Rail.

Please fill in the full postal and rail address; sometimes orders reach us without either name or address, and it is impossible to trace the senders.

To the Account of _____

Full Postal Address _____

Railway and nearest Station _____

Name of Gardener _____

If prepaid, please fill in amount of remittance; 1*s.* in the £ discount may be deducted, or if this is not done a liberal equivalent in goods will be added (excepting Barr's 'Covent Garden' Collections, which are strictly nett).

£ s. d.

Prepaid Orders sent Carriage Free.

Money and Postal Orders payable Covent Garden; these and Cheques should be crossed 'London & County Bank.'

Date _____ 1899

Signed _____

*** We hope our Customers will mark their wants on this Order Form, as it will give them less trouble than writing out an order, and it will facilitate its execution.

Under the Columnar headings 'QUANTITY,' write in Figures how many Bulbs, &c., are required.
